Bostik FLEX-IQ® Technology has been developed to unburden the professional craftsman and architects

The construction world is dynamic. Continuous changes of construction products, regulations and legislation. Clients become increasingly demanding. Environmental aspects will be sharpened. As a construction professional, you want to design and realize aesthetically beautiful and technically perfect solutions. But where do you start, what do you have to take into account, and how do you separate the wheat from the chaff. At Bostik we understand your daily constraints. This was the reason for Bostik to compile a small portfolio of high-quality sealants. These sealants tick all the boxes in the field of application, offering a perfect adhesion without the use of a primer and are extremely easy to apply and smoothen. Once applied and finished, the sealants are highly elastic and thus ensure a durable long-lasting functional life expectancy.

BOSTIKS MISSION AND VISION

It is Bostik's vision that our smart adhesives make our world safer, more flexible, efficient and responsive to the dynamic challenges of our environment. In line with our strategy we develop therefore innovative adhesive solutions that make whatever is assembled, build, or constructed smarter and more adaptive to the forces that shape our daily lives.

BOSTIK FLEX-IQ

The combination of flexibility and efficiency and smarter and adaptiveness, as well as by positioning customers and end-users centric in our business model and understanding our customers' needs and demands, it was a logical process of launching the Bostik FLEX-IQ portfolio. Bostik FLEX-IQ is compact portfolio of high-end and high-quality sealants of which the prepolymers are manufactured inhouse to be able of reaching your product demands and expectations.

Bostik FLEX-IQ is a combination of flexible and intelligent products for smart end-users. The Bostik FLEX-IQ sealants are highly flexible and efficient during their application phase and aesthetic during their long-lasting life once applied. Bostik FLEX-IQ sealants are equipped with high-end certifications.

The Bostik FLEX-IQ high performance sealants are meant for all professional caulking contractors, craftsman's, building contractors and architects, looking for a high-end sustainable solution. But also the builders merchants and hardware stores. In fact Bostik FLEX-IQ is for those who expect complete unburdening from their supplier, in terms of technology, performance, certification, durability, sustainability, application,

aesthetic and safety. The Bostik FLEX-IQ portfolio exists out of high quality sealants that basically do not need preparation work, can be processed quite simple, quick and easy and are perfectly toolable to a smart finish to achieve the highest levels of professionalism, aesthetics and performance. In addition, Bostik FLEX-IQ will offer full CE certification, ASTM C920 and many environmental, health and safety certifications. Bostik FLEX-IQ will be the sealant portfolio for the future, given to you today!

SMART SOLUTIONS READY FOR TOMORROW
"Time saving solutions combined with very high quality, flexibility, reliability and durability for all sealant jobs."

- Friendlier to use, for human and nature
- Easier and quicker to apply, time saving
- Perfect finish and appearance, high-end
- High movement capability, extreme flexible
- Extreme great performance
- Durable and sustainable, long-lasting
- CE marked and ASTM C920

All substrates must be solid, clean, dry, and free of grease and dust. Substrates can be cleaned by using Bostik Cleaner. Extremely porous substrates may need pre-treatment with Bostik Primer. Always test adhesion prior to the application. Use Bostik Finisher to smoothen and tool the sealant. More information about the correct installation of a joint sealant, the joint dimensions, the use of a backer-rod and how to tool the joint sealant properly can be found in the Bostik Brochure CONSTRUCTION & FACADE.
