Super Adhesive

Fast super glue

PRODUCT DESCRIPTION

Zwaluw Super Adhesive is a liquid, fast curing adhesive based on cyanoacrylic. The adhesive cures through contact with moisture.

KEY BENEFITS

- Cures in seconds
- For bonding rubber, glass, metal and plastic

APPLICATIONS

Zwaluw Super Adhesive was developed for bonding among others rubber rings, glass, metals and plastics at for example modelling, jewellery and ornaments. Also for bonding rubber profiles in glazing systems.

DIRECTION FOR USE

The surfaces to be glued must fit together well. Apply glue to one side, straight from the plastic bottle and hold the parts together while applying pressure for 5 seconds. For best bonding the adhesive layer must be thin. Do not apply the adhesive in excessive quantities. Take care that the adhesive does not come in contact with the eyes or skin. Always test adhesion prior to application.

TECHNICAL SPECIFICATIONS

Application Temperature	+5°C to +30°C
Base	Cyano-acrylic
Curing Time	3-30 seconds
Density	1,05 g/ml
Open Time	0-3 seconden
Tensile Strength	10 N/mm ²
Viscosity	120 mPas

These are typical values

LIMITATIONS

Not suitable for PE, PP, PC, PMMA, PTFE, soft plastics, neoprene and bituminous substrates

SURFACE PREPARATIONS AND FINISHING

Application temperature: +5°C to +30°C (applies to environment and substrates). All substrates must be smooth, clean, dry, and free of dust, oil and grease. Before using the Zwaluw Super Adhesive refer to the Health & Safety Sheet.

CLEANING

After skin contact immediately wash with lukewarm water and soap and rinse thoroughly.

SHELF LIFE

In unopened original packaging between +5°C and +25°C, shelf life till 12 months after date of production, stored in a dry place.

HEALTH & SAFETY

Product Safety Data Sheet must be read and understood before use. These are available on request and via our websites

WARRANTY & GUARANTEE

Bostik warrants that its product complies, within its shelf life, to its specification.
