

Sealing & Bonding Smart Range

A COMPLETE RANGE FOR THE PROFESSIONAL USER

BOSTIK, SMART ADHESIVES

The new logo and the new house style with the characteristic green gecko is more than just a visual appearance. “Smart Adhesives” is a reflection of our positioning with regard to the development of smart and innovative sealing and bonding solutions that are safe, flexible and efficient.

We develop innovative sealing and bonding solutions that, whatever is constructed, connected or built, are smarter and can adjust better to the forces and challenges in our daily life.

THE GECKO - INSPIRING ADHESION

For centuries, scientists have been inspired by geckos because of their unique bonding mechanism. They can stick to almost any surface, can climb super-fast against smooth polished glass and can easily carry their entire body weight with just one toe.

The Bostik gecko is flexible, easy to adapt to environments, is open to new situations and is courageous. It symbolizes Bostik's smart and innovative sealing and bonding solutions for the challenges which today's market faces.

1. Introduction

At the forefront

Bostik is one of the largest and leading adhesive and sealant companies. Worldwide, we employ 6,000 people in more than 50 countries across all continents. Our smart adhesive and sealing systems are used globally in the construction of new buildings and refurbishment projects. Bostik is rightfully the market leader and can be seen at the forefront of bonding and sealing solutions with a complete portfolio of 'smart' products. In the architectural world the façade of a building is often the most important aspect of its design. 'Façade' comes from the French, which in turn comes from the Italian facciata, from faccia meaning face or front; and ultimately from the post-

classical Latin facia. The earliest usage of the word recorded by the Oxford English Dictionary was in 1656. From an engineering perspective, the façade is also of great importance to the building due to its impact on energy efficiency. Luckily a lot of improvements and developments have taken place since 1656 and Bostik offers a portfolio of smart products that are fully adaptable and in line with building specifications and requirements. What hasn't changed over the centuries is the movement of building materials due to temperature differences and mechanical loads. Bostik offers a comprehensive portfolio of high-end sealants for movement and expansion joints.
