SEAL 'N' FLEX ONE PLUS P590

Low Modulus Polyurethane Sealant

Bostik Seal 'N' Flex® One Plus P590 is a low modulus, bubble free curing, universal polyurethane sealant for construction and expansion joints. When cured it will form a tough and flexible seal capable of cyclic expansion and compression movement of +100%/-50%.

Features and Benefits

- Low modulus
- +100%/-50% joint movement
- Extremely elastic, > 1,000% elongation at break
- Bubble free curing
- Sag free, easy tooling
- Excellent durability
- UV resistant
- Paintable

Packaging : 600ml sausage

Color (s) : Gray, White and Black

SEAL 'N' FLEX PREMIUM P795

High Performance Polyurethane Sealant & Adhesive

Bostik Seal 'N' Flex® Premium P795 is a new generation, high modulus polyurethane sealant and flexible adhesive in one. Designed for sealing construction and expansion joints and joints in pedestrian walkways. It can also be used as an elastic adhesive for most common building materials. When cured it will form a durable seal capable of cyclic expansion and compression movement of $\pm 50\%$.

Features and Benefits

- High modulus
- Bubble free curing
- $\pm 50\%$ joint movement
- Sag free
- Easy tooling
- Permanently elastic
- High mechanical resistance
- 2 in 1 application
- UV resistant
- Paintable

Packaging : 600ml sausage

Color (s) : Gray, White and Black

SUPER VULCASEAL CONCRETE, NATURAL STONES & TILES

Polyurethane Sealant

Super Vulcaseal Concrete, Natural Stone, & Tiles is a low modulus, class A polyurethane sealant. When cured, it forms into a tough flexible seal capable of cyclic and compression movement. It has excellent resistance to normal weathering condition such as rain, ozone, atmospheric contamination and pollution.

Features and Benefits

- Excellent adhesion
- Permanently elastic
- Non-sagging or Thixotropic
- Paintable
- Non-staining
- Easy to apply

Packaging : 300ml cartridge

Color (s) : Gray

This picture is for application reference only

SUPER VULCASEAL GLASS, uPVC & ALUMINUM Silicone Sealant

Super Vulcaseal Glass, u-PVC & Aluminum is a premium neutral cure silicone sealant especially designed for glass, aluminum and u-PVC sealing applications. It cures by absorption of atmospheric moisture to form an elastic and durable elastomeric sealant.

Features and Benefits

- Highly compatible & adhering to glass, aluminum & u-PVC substrates
- Permanently elastic
- Resistant to aging, weathering, UV light & temperature extremes
- Primerless

Packaging : 300ml cartridge
Color (s) : Translucent

This picture is for application reference only

SUPER VULCASEAL POLYCARBONATE, STAINLESS STEEL & METAL Silicone Sealant

Super Vulcaseal Polycarbonate, Stainless Steel, & Metal is neutral cure silicone sealant that is suitable for several usages. When cured, it will form a tough and flexible seal of the original installed width. Can be used for both interior and exterior application.

Features and Benefits

- Excellent adhesion
- Permanently elastic
- Resistant to stress-cracking
- Non-corrosive
- Resistant to sustained flexibility at extremes temperature
- Resistant to vibration, moisture, UV light and weathering

Packaging : 300ml cartridge

Color (s) : Translucent

This picture is for application reference only

SUPER VULCASEAL

Elastomeric Sealant

Super Vulcaseal is an elastomeric, solvent-release temperature curing sealant. It is best used for sealing, patching and filling of leaks, cracks, holes and gaps. In its cured state, it is transformed into a tough, elastomeric material which allows for reasonable motion or movement of connected elements without cracking or losing adhesion.

Features and Benefits

- Ready mixed one component sealant
- Easy to apply and spread over a variety of materials
- Produces fast drying film with high initial set
- Good weather resistance
- Outstanding water and chemical resistance
- Reasonable slump resistance
- Excellent bonding to galvanized iron (G.I.), PVC, concrete and the other construction materials.

Packaging : 1 gallon | 1 liter | ½ liter | ¼ liter
Color (s) : Gray
