PRODUCT GUIDE

ABOUT US

Bostik New Zealand Limited has been supplying the local industry with innovative, high quality products for over 50 years. We are the trusted name in adhesives, sealants, waterproofing and cementitious products. Whether you're a DIYer, or you work for a large construction company, Bostik has a solution for your project.

Our strong development team has the backing of a global organisation that is number two world-wide in

adhesives. With this dual strength of a global resource of specialist chemists and local development, Bostik is at the forefront of adhesive technology and has the ability to provide fast delivery of innovative solutions.

The New Zealand production team is committed to producing adhesives and sealants economically, safely and of consistently high quality.

3

ABOUT THIS GUIDE

Green Star rating is used to assess the environmental impact of a building. A building project is evaluated against eight environmental impact categories. Points are awarded within each category, for initiatives that demonstrate that the building project has met the specific criteria of each category credits.

Sealants and adhesives fall within the Indoor MAT4 category and account for 12% of the total category credits. The aim of the credit is to reduce the level of Volatile Organic Compounds (VOC) in a building project.

This Guide demonstrates how the Bostik range of products achieve and exceed the low level of VOC required for Green Star Compliance. Each product in this Guide is presented with four parameters to help you to determine which product is most suitable for the required application.

✓ VOC Required Rating (VOC Req)

This shows the maximum level of Volatile Organic Compounds (VOC) permissible according to Green Star requirements for MAT4. Measurements in grams per litre.

✓ CETEC Certificate (CETEC)

Selected products that have been independently verified as having low VOC.

Please refer to www.bostik.co.nz for CETEC certificates.

✓ VOC Actual Rating (VOC Act)

Volatile Organic Compounds (VOC) detectable in a product. Measurements in grams per litre.

✓ Red List

The product has been evaluated and does not contain any materials that are on the Red List Building Materials.

Please refer to www.bostik.co.nz for Technical Data Sheets.

overhead applications

Conforms to AS 2753-1985

TUF AS NAILS WB Water based construction adhesive

Water based, high strength acrylic stud adhesive. Minimizes nail and screw popping caused by timber shrinkage or frame movement, when applied in accordance with AS/NZ5. Reduces the quantity of nails and screws required to fix plasterboard, therefore reducing the fastener head stopping and finishing requirements. Made in NZ. Available in cartridge and sausage.

solid floors/walls

GOLD ULTRA Water-based, general purpose construction adhesive

Premium water-based, high-bond strength construction adhesive. Very fast curing. Designed for fixing wall and floor panels, and bonding to a wide range of substrates including timber, metal, gypsum, masonry, ceramic, Formica, polystyrene, mirrors and most other construction material, as long as one substrate is porous. Made in NZ. Available in cartridge and sausage.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free

- Bonding chipboard, plywood, Hardie-Flex sheeting to joints or solid floors/ walls
- Fixing ceramic tiles to wood or plywood

sheeting to studs or solid walls

- Fixing mirrors to timber
- Plastic foams (polystyrene or polyurethane)

Water-based, high strength, plasterboard and stud adhesive. Minimises nail and screw "popping" caused by timber shrinkage or frame movement if applied in accordance with AS 2589-2007. NZ made. Available in pail and sausage.

MS ADHESIVES

MS SAFE FIX Solvent free, high performance MS construction adhesive

BRANZ appraised, multi-purpose, heavy duty, MS-based adhesive for construction & building. Elastically seals most building materials and surfaces. Green Star compliant. Exceptionally high initial grab. Available in cartridge only.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
9	50-70	Panel and Multipurpose construction adhesives	F0911-35	Y

KEY FEATURES

RECOMMENDED USES

- BRANZ appraisal 662 for structural loads and durability
- Ideal for green buildings Low VOC, odour-free, solvent, silicone and isocyanate-free
- Exceptionally high initial grab Ideal when using no mechanical fasteners (check with Bostik Technical)
- Adheres to most common building substrates, polystyrene safe.
- Easy, low temperature gunning.
- Highly flexible, paintable, very low shrinkage, non-slump
- Interior/Exterior all weather, UV resistant
- One component

- General construction adhesive
- For fixing wall panels, floors, and door frames to most common building substrates.
- For adhering solvent sensitive substrates (such as mirrors and polystyrene)
- Elastically bonding different materials with each other
- Bonding granite, marble and tiles
- Bonding skirting of many different types

SIMSON PANEL TACK Solvent free, high modulus panel adhesive

High modulus, moisture-curing, MS-based, elastic panel adhesive. Bonds exterior flat façade panels such as fibre cement cladding panels and durable plywood panels. Available in cartridge and sausage.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
12	50-70	Panel and Multipurpose construction adhesives	CV130307a	Y
KEY FEATURES		RECOMMENDED USES		
Solvent- and isocyanate-free	Solvent- and isocyanate-free		applications	
 Excellent mechanical strength, with simple and fast fixation 		 Mounting of exterior wall cladding, roof tr 		or exterior
 Long term, high elasticity with optimum distribution of strain 				
Good moisture and weather resistance				

The original, high quality, professional MS adhesive with an extremely high initial tack and strength. It will adhere heavy materials without mechanical fixing or bracing while curing, and provides a long last hold; withstanding an incredible 450kg/m², based on initial adhesion and immediate strength. Available in cartridge only.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
1.94	70	Multipurpose construction adhesives	CHEM-203131-2	N

KEY FEATURES

RECOMMENDED USES

- Neutral cure
- Moisture and weather resistant

· Check approvals on TDS

- Suitable for both indoor and outdoor use
- Adheres heavy materials without fixing or bracing while curing; withstanding 450kg/m², based on initial adhesion
- Excellent adhesion without primer on most (including damp) non porous surfaces
- Long-lasting hold
- No isocyanates, solvents, silicones
- Permanently elastic, with no shrinkage
- Low VOC applications

- Ideal for mirrors, splashbacks, shelving, wall displays, headboards etc.
- For adhering solvent sensitive substrates (such as mirrors, glass and polystyrene)
- Ideal for a wide range of building materials such as concrete, mirrors, glass, PU, uPVC, hard plastics, enamel, ceramics, metals, stainless steel, wood and more
- Bonds both porous and non porous materials

SILICONE SEALANTS

ROOF & GUTTER SILICONE Weatherproof, premium 100% silicone sealant

Waterproof, weatherproof, permanently flexible neutral cure sealant. Excellent adhesion to common construction materials and metals. Will not corrode bare metal. Available in cartridge in translucent.

ageing stability

• Thixotropic - non-slump

• Excellent UV Stability, long life reliability and natural

- Stays permanently flexible
- Tested and certified to common NZ bathroom plastics and ceramics
- For kitchens, bathrooms, laundries and other wet area applications
- To seal and waterproof around bathtubs, shower stalls, wall fixtures, rimless sinks, taps, basins and ceramic tiles
- Bonds to most common bathroom materials including glazed ceramic tiles and ceramic tile grouting, glass, steel, zinc, copper, aluminium, powder coated aluminium, wood, fibreglass, vitreous enamel, most plastic and painted surfaces and most laminated surfaces
- Cementitious substrates such as concrete, mortar and fibre cement panels
- Ideal for hot and humid environments

V60 GLAZING SEALANT Glazing Silicone Sealant

Premium grade, neutral cure glazing weatherproofing silicone sealant. Superior adhesion to aluminium and glass has made Bostik V60 a market leader in the glass market for 15 years. As it cures it has UV and weather stability; maintaining a reliable, flexible and durable elastomeric sealant by absorbing atmospheric moisture. Suitable for all types of glazing and waterproofing. Available in cartridge in transparent and black.

Drinking water – tank manufacturing

POLYURETHANE SEALANTS

SEAL N' FLEX 1 Polyurethane construction joint sealant

Low modulus, polyurethane sealant. When cured, forms a tough, flexible seal and bond capable of cyclic expansion and compression movement of up to 100% (+ 50%) of the original installed joint width. Paintable, acoustic rated and durable in harsh weather conditions. Specified sealant for James Hardie Systems. Available in cartridge and sausage in white, grey and black. Additional colours available in batch quantities.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free

KEY FEATURES

RECOMMENDED USES

- CSIRO RILEM LONG-TERM SEALANT DURABILITY STUDY DBCE Doc. 97/196M
- ISO 11600 Class F-25LM.
- Water potable to AS4020.
- Fungal resistant to AS1157-1972.
- NZ Food Safety Authority Approved Maintenance Compound (Non-Dairy).
- DIN 18540 and SNJF low modulus external joint sealant
- ASTM C920.87 AND 98 as Type S, Grade NS, Class 25, use NT, G, A, M and O as external joint sealant
- · Acoustic rating
- Low modulus 100% (+/- 50%)
- Resists dilute acids, alkalis and some solvents.
- Unaffected by normal weathering conditions
- Excellent durability retains original properties even after years of weather and UV exposure
- Paintable (refer Limitations), non staining
- One component

- · Interior and exterior movement joints
- Heavy commercial applications
- Expansion joints
- · Door and window framing
- Building and construction applications
- · Fibre cement sheets
- Precast and tilt up panels
- · Insitu concrete and render
- Brick and blockwork
- Concrete
- Aluminium windows
- · Granite, sandstone and marble
- GRC, Fibreglass and most speciality panel systems.
- Plasterboard face and paper lined recessed edges
- Primers: N40 Primer for non-porous and metal substrates, N49 for porous substrates

Trafficable medium/high modulus, Class-A polyurethane sealant. Suitable for vehicle and pedestrian traffic areas, and chemical areas. High performance, high bond strength and fast cure. When cured, forms a tough and permanently elastic seal capable of cyclic, expansion and compression movement of up to 50% (+/- 25%) of original joint width. Paintable, and durable to harsh weather conditions. Available in cartridge and sausage in white, grey and black.

VOC Content (g/L)	voc Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free

MS SEALANTS Continued

SIMSON ISR 70-03 Flexible MS joint adhesive/sealant

MS based adhesive / sealant for making high strength elastic constructive joints. Guarantees an increased and controlled cure speed and reliability in the production process, and extends the application possibilities. Available in cartridge and sausage in white, grey and black.

- Solvent, isocyanate and PVC free
- Neutral, odourless and fast curing
- Very good UV-resistance and ageing properties
- Good adhesion on several substrates without the use of a primer
- Paint compatible with most industrial paint or lacquer systems, both alkyd resin and dispersion based (paint compatibility test is recommended)
- Paintable after skin forming (wet on wet); this will not influence the curing speed
- Elastic bonding and sealing in bus, caravan, train and truck construction
- Bonding and sealing of sunroof systems
- Bonding of roofs on buses, trains, trucks
- Bonding of corner profiles of aluminium or polyester on trailers
- Bonding of polyester parts on metal frames
- · Bonding of floor systems
- · Sealing welded seams

SIMSON ISR 70-05 AP Advanced performance adhesive/sealant

MS based adhesive with high tensile strength, suitable for making elastic constructive joints, and can also be used as a sealant. Tested and certified to Fire Test Procedures for Surface Flammability. Approved for bonding deck materials onto steel or aluminium. Guarantees an increased and controlled cure speed and reliability in the production process and extends the application possibilities. Available in cartridge and sausage in white, grey and black

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
19	250	Architectural sealants	CV130307a	N

KEY FEATURES

RECOMMENDED USES

- Neutral, odourless and fast curing
- Tested and certified to the International Maritime Organisation Fire Test Procedures for Surface Flammability, resolution A.687
- Solvent, isocyanate and PVC free
- Very good UV-resistance and ageing properties
- Good adhesion on several substrates without the use of a primer
- Paint compatible with most industrial paint or lacquer systems, both alkyd resin and dispersion based (paint compatibility test is recommended)
- Paintable after skin forming (wet on wet); this will not significantly influence the curing speed

- Elastic bonding and sealing in bus, caravan, train and yacht construction
- Bonding of roofs on busses, trains, trucks
- Bonding of corner profiles of aluminium or polyester on trailers
- Bonding of polyester parts on metal frames
- Bonding of floor systems

FIRE-RATED SEALANTS

FIREBAN ONE Fire & acoustic rated polyurethane construction sealant

Intumescent, low modulus, Class A polyurethane sealant, for fire rating of jointing of concrete, precast panels, block and brick work, drywall systems, electrical cables and pipe penetrations, in conjunction with other systems such as fire collars, board systems, pillows and fire-rated mortars. When cured, forms a tough, flexible fire-rated seal capable of cyclic expansion and compression movement of 50% (±25%) of the original installed joint width. Available in sausage only in Grey.

ASBESTOS ENCAPSULATION

IDENDEN 30 330 Asbestos penetrant and dust suppressant sealant primer

Dust/fibre suppressant for removal of Asbestos Contain Material (ACM). Used to remove hand applied asbestos, spray applied asbestos and asbestos clad in hard setting compounds.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
<1.0	775	Sealant primer	Calculated VOC	N
KEY FEATURES		RECOMMENDED USES		
Excellent removal penetrant which lowers risk of asbestos dust exposure Water borne Excellent penetration to reduce fibre count Easily applied by brush, drip feed, spray or injection Low evaporation rate chemicals Non-flammable Low odour		It has been successf applied asbestos and silicates and hard ser	l various asbestos m	, ,

EXPANDA PRO GUN FOAM High yield, low expansion PU expanding foam

BRANZ Appraised, professional grade, gun applied, self-expanding polyurethane foam. Very high yield (up to 50L) and low post-expansion in one product. Seal, fills cavities, minimises sound, provides air seal, eliminates draughts. Excellent adhesion to most substrates. Available in gun applied aerosol can.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
< 260g/l	250	Architectural sealants	Calculated VOC	N

KEY FEATURES		R	ECOMMENDED USES	
Can bridge caps up to 3mm Superior sound control, typ cork underlay Includes Thickness Control	erior sound control, typically outperforming 6mm underlay udes Thickness Control Spacer Technology which ntains the adhesive thickness between flooring and		e, terrazzo, ceramic f plywood and cement rk, solid strip softwo boo flooring.	

Bostik Dampfix Gold

WATERPROOFING

ASA DAMPFIX GOLD Water-based liquid polyurethane waterproofing membrane

BRANZ Appraised, highly elastic, Class 3, water-based polyurethane waterproofing membrane system. Specifically formulated for application on graded substrates that provide positive falls to drainage outlets. This is a 2-coat system applied over primed porous and non-porous substrates.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
144	250	Architectural sealants	CV120417	N

<1.0	65	Ceramic Tile Adhesive	CV150822	N
KEY FEATURES		RECOMMENDED USES		
Brilliant white colour Smooth and unsanded Ideal for bathrooms and mosaics Easy to trowel		 Suitable for Indoor walls use only Light coloured or translucent tiles When a bright white adhesive is needed Glass tiles, bathroom walls, concrete, render, fibre cement, 		
• Low VOC		plasterboard • Dampfix Gold, Dampfix 3		

Terrazo, Glass, Stone

• All moisture stable tile types – Porcelain, Ceramic, Terracotta,

PRIMERS & ADDITIVES

ASA MULTIPRIME General purpose primer

General purpose acrylic primer for use on porous surfaces. ASA Multiprime is a milky pink liquid. NZ made.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free	
20	775	Sealant Porous Primer	F1103-32a	N	
KEY FEATURES		RECOMMENDED USES			
Fully Compatible with ASA Tile Adhesives and most Bostik Waterproofing Membranes Improves bond and working times Reduces membrane pin-holes Seals in minor dust contamination Helps improve consistency of surface		Indoors and outdoors General Purpose Primer Priming porous surfaces before tiling or waterproofing - concrete, render, fibre cement, plasterboard, autoclaved aerated concrete (AAC), timber Floors and walls Cover with tile adhesive, waterproofing membranes or general cement based systems Ensure the surface to be primed is correctly installed, suitable for the intended use and adequately prepared			

ASA MEGALASTIC Multi-purpose additive

A multi-purpose additive to upgrade the performance of cement-based tile adhesives, grouts, screed and other similar systems. Improves adhesion, flexibility and water resistance but maintains workability, open time and pot life. Suitable for outdoors and full immersion once cured. NZ made.

VOC Content (g/L)	VOC Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free	
24	65	Ceramic Tile Installation	F1103-32a	N	
KEY FEATURES		RECOMMENDED USES			
Long working times Smooth trowel feel Suitable for immersed applications Improves bond strength and flexibility		General purpose additive for cement-based systems Increasing adhesive or grout performance Immersed installations Upgrades flexibility, adhesion and water resistance without the loss of open time, pot life and workability. (Does not make these products sticky – even when used neat) Can be used with all simple sand/cement systems – screeds, mortars, renders			

UL 200 Superior Vinyl & Timber underlay

Rapid hardening polymer modified cementitious underlay formulated for maximum flow without shrinkage or cracking. It receives overlays within 1 - 2 days, depending on the overlay material. Available in 20kg bags.

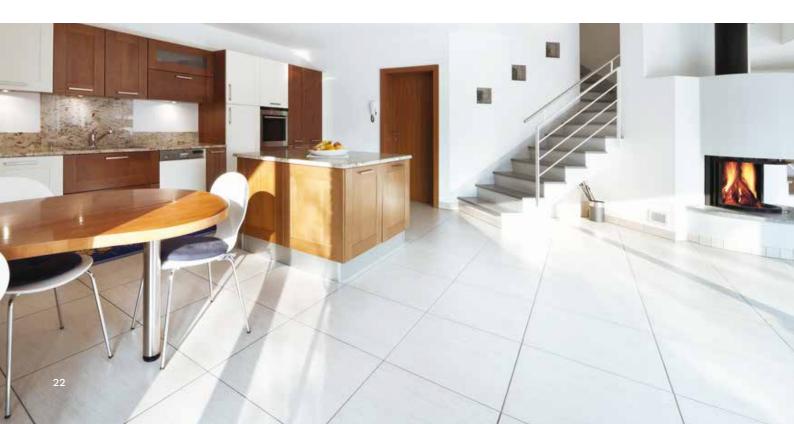

VOC Content (g/L)	voc Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
1	1	Floor levelling	Calculated VOC	N
KEY FEATURES		RECOMMENDED USES		
• Accepts foot traffic in 2 - 3 hours • Single component, just add water • Very fast application, single operation • Dimensionally stable • Rapid curing • Receives vinyl & timber after 16 hours • Receives carpet & tile after 6 - 8 hours • Can be applied directly onto prepared concrete surfaces		Superior underlay for vinyl & timber floor coverings (may be used under carpet & tile if quick covering time is required) Reinstatement of new or existing concrete floors subject to foot traffic, industrial equipment, and fork lift traffic or trolleys. Residential, commercial and industrial applications Heavy industrial traffic Wet areas (not immersed) Suitable for subfloor heating		

UL SCREED Modified cemetitious screed

A fast setting, high build, modified cementitious underlay/screed. Especially formulated for quick and easy application to achieve required falls without any shrinkage or cracking. Available in 20kg bags.

VOC Content (g/L)	voc Limit (g/L)	RULE 1168	CERT NO.	RED LIST 3.0 Free
1	1	Floor Levelling	Calculated VOC	N
KEY FEATURES		RECOMMENDED USES		
Replaces the need for sand and cement mixing onsite Single component – just add water Rapid setting, shrinkage compensated to minimise cracking during cure Can be walked on after 1 hour depending on site temperature and condition Accepts waterproofing membrane after 4 hours at 20°C Most floor coverings can be applied after 24 hours Excellent bond strength to concrete and cement sheet (FC sheet) substrates		External balconies or in ramp applications Wet areas where controlled falls are required. Onto concrete and FC (Cement sheet) sheet substrate Residential, commercial or medium industrial applications. As a system in conjunction with Bostik/ASA wet area internal waterproofing membranes. Suitable to use on external balconies, ramp applications and wet areas where controlled falls are required
