# BLOCK P550

## BOSCOSEAL PUW

### WATERPROOFING

WATER-BASED MODIFIED BITUMEN-POLYURETHANE  
LIQUID-APPLIED WATERPROOFING MEMBRANE

**BOSTIK BLOCK P550 Boscoseal PUW** is a one-part water-based modified Bitumen-Polyurethane liquid applied waterproofing membrane. After curing, it forms a tough, highly elastic, impervious barrier to moisture. Suitable for application by brush, roller or trowel.

#### RECOMMENDED FOR

- Masonry walls, foundations and basements
- Roof lap slabs, balconies and courtyards
- Beneath terrazzo, paving and quarry tiles
- Bathrooms, laundries and wet areas prior to tiling
- Planter boxes

#### BENEFITS

- Water-based
- One component - No mixing
- Early access for following trades
- Brush, roller or trowel applied
- Does not brittle with age
- Exhibits tenacious adhesion to masonry
- Non re-emulsifying
