MULTI GROUT PLUS

Can be used for grouting tiles, mosaic, natural stone etc. on both walls and floors with a joint width of up to 5 mm. Suitable for soft and absorbant tiles. Multi Grout Plus is an extra fine structured grout.

FLEX GROUT PLUS

Can be used for grouting tiles, mosaic, natural stone, granit etc. on both walls and floors with a joint width of 2-20 mm. Suitable for non-absorbent ceramic tiles. Flex Grout Plus is a light structured grout.

NOTE! The colour samples and NCS codes are for guidance only. The final colour depends on the substrate, tile adhesive, water content, width, depth and temperature.
