PRODUCT DESCRIPTION

Bostik FP403 FIRESEAL HYBRID is a fire retardant, elastic and paintable hybrid sealant. **Bostik FP403 FIRESEAL HYBRID** is fire resistant for up to 4 hours in linear (movement) joints. Absorbs up to 25% of movement.

APPLICATIONS

Bostik FP403 FIRESEAL HYBRID was specifically developed for fire resistant sealing of connection and expansion joints in construction, which in case of fire, should have a certain fire resistance and prevents spreading of fire, smoke and toxic gases. Also certified for horizontal joints, connection floor/ceiling with wall, wooden and steel. frames, stony substrates and all metal-stud applications. Fire resistance tested according to EN 1366-4 for up to 240 minutes in a joint of 30 mm wide. Choose the correct fire resistance for your application by consulting the classification and test reports.

DIRECTIONS OF USE

A joint with the correct dimensions is able to absorb movements between building materials. The joint depth should always be in the correct relationship of the joint width. A general rule is the ratio of joint depth to the width of the joint with a joint width up to 10 mm is 1:1, with a minimum of 5 mm in width and depth. For joints wider than 10 mm, the depth is the width divided by 3 plus 6 mm.
