

ADHESIVE CLEANER

TECHNICAL DATASHEET

Version: 2019-02-05

PRODUCT DESCRIPTION

Consists of a combination of solvents with active surface substances that provide effective swelling and removal of e.g. glue residues. The product is gentle on the surface and colour of e.g. floor and wall rugs

AREA OF USAGE

For removal of glue residues from water-based and solvent-based glue. Can also be mixed with washing water and used for cleaning during e.g. gluing of wall rugs.

WORKING INSTRUCTION

1. Check the material's colour fastness. 2. Non-dried glue is removed immediately with diluted Adhesive Cleaner. After a few minutes of swelling, the glue residues are removed with concentrated Adhesive Cleaner. For lighter stains and general cleaning, dilute Adhesive Cleaner with approx. 15 parts water.

SAFETY

The product is flammable and hazardous. Please see the product data sheet for more information
