

FIRE RETARDANT COATING FP 312

FIRE RETARDANT
ABLATIVE COATING

BOSTIK FP 312 FIRE RETARDANT COATING is a sprayable ablative coating specially designed to enhance, seal and fire protect stone wool fibres. Stone wool fibres coated with Bostik FP 312 Fire Retardant Coating prevent the spread of fire and smoke through openings in fire rated walls and floors where openings are formed to allow the installation of multiple building services.

- Certified to the latest European standard EN 1366-3 & 4
- Fire resistance up to 4 hour
- Permanently flexible - will accommodate movements during fire and smaller movements in the construction it has been fitted within
- Easy and very quick to apply
- The coating applied on stone wool fibres is classified for all types of constructions with or without building service penetrations
- Paintable with most water based and alkyd paints
- Easy to clean
- Once fully cured, resistant of water and frost
- CE marked to ETAG part 2 & 3
- Complies with requirements of M1 Protocol
