

Technical Data Sheet

Multi Bond 30mL Blister

Description

Bostik Multi Bond is a general purpose solvent based Nitrile Rubber Adhesive. It is nearly clear in colour and will give excellent bonds that are both chemical and temperature resistant. It is packaged in a convenient aluminium tube for ease use.

Features

- Nearly clear in colour
- Quick bonding
- Easy to use
- Chemical and temperature resistant

Recommended Uses

- It has many household and industrial uses and is particularly suitable in bonding leather, metals, wood, canvas PVC and other plastics.
- It is widely used in the repair of toys, leather goods, furniture, upholstery, jewellery and in the handicraft making areas.
- This is an excellent product where quick bonding and a clear bond line is required especially in the DIY market.

Application Instructions

Surface Preparation

- Surfaces to be bonded must be dry, clean and free of grease.
- If surfaces are non porous, smooth and glossy, roughen with glass paper (preferably) or apply solvent such as Acetone.

Application

- **As a two way dry stick:**
Apply an even film onto both substrates, leave 5-10 minutes then join together with as much as possible taking care not to trap any air.
- **As a one way wet stick:**
Usually this technique is employed when either one or both of substrates to be bonded are porous (e.g. fabrics, cardboard).

Clean Up

- Any wet or partially wet adhesive can be removed with scraping and Bostik Solvent 9901. Dried adhesive is best removed with a scraper or by sanding.

Properties

Base:	Nitrile Rubber/Resin Based Solution
Form:	Medium Liquid (Brushable)
Viscosity:	2400 cps \pm 200
Colour:	Clear to translucent
Solids Content:	27.5 \pm 1%
Solubility:	Approx. 0.88

Storage & Shelf Life

A minimum of 12 months in original sealed packaging if stored under cover away from heat.

The information in this Technical Data Sheet is intended for the assistance of purchasers and is of a general nature. It reflects the extent of our knowledge and experience of our products and is based on tests which we believe to be reliable. However, no guarantee of accuracy can be given due to the wide range of surfaces, environmental and field conditions and variations encountered in raw materials, manufacturing equipment and methods at the place where the work is performed. Some of these will be beyond our knowledge or control. We recommend purchasers carry out their own tests to determine the suitability of the product for their particular purposes.
