

FIBERDUK PP

TECHNICAL DATASHEET

Version: 2019-03-18

PRODUCT DESCRIPTION

Fiberduk PP is comprised of polypropylene fabric. Fiberduk is not waterproof and is used in Bostik's rolled waterproofing systems.

AREA OF USAGE

Fiberduk Universal is used as a reinforcing sheet in the rolled waterproofing systems. In addition to the reinforcing effect of the fibre sheet, it also ensures that the correct thickness of waterproofing is achieved. You also save on installation time when you insert the fibre sheet between membrane layers (wet in wet).

WORKING INSTRUCTION

When used in wet room construction, please refer to the current installation instructions.

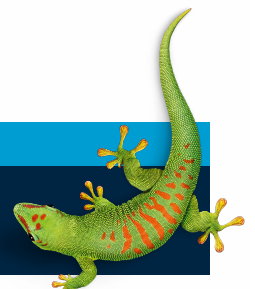

SAFETY

Read the safety data sheet.
