

# Back yourself

## PEF BACKING ROD

### **GOOD EXPANSION RECOVERY FOR A PERFECT FIT**

- Closed cell rod does not absorb water and there is no out-gassing
- Non toxic, odourless, resistant to sealants
- Wide range of sizes
- Easy to install
- Very light weight

# Bostik PEF Backing Rod

## A POLYETHYLENE FOAM BACKING ROD FOR USE IN:

- Areas where window and door air seals are required in conjunction with Bostik Expanda Pro Foam
- Areas around windows and doors to limit the sealant depth in conjunction with Bostik Seal 'N Flex 1, Bostik Seal 'N Flex FC, Bostik Fireban 1 and Bostik MS Safe Seal
- Expansion and control joints to limit sealant depth and provide bond break surface for two-sided adhesion. Use with Bostik Seal 'N Flex 1, Bostik Seal 'N Flex FC, Bostik Fireban 1 and Bostik MS Safe Seal
- Penetration through walls and floors before sealing with Bostik Expanda Pro Foam

## INSTALLATION (PLEASE REFER TO TDS FOR DETAILS)

- PEF Backing Rod should be 25 to 30% wider than joint or penetration to be filled
- Measure and cut PEF Backing Rod to required length
- Gently press the rod into the joint or penetration using a blunt-edged tool
- Do not stretch or twist the rod while applying
- Ensure there are no gaps by butting joints snugly
- If rod is punctured while applying, cut and remove affected piece and replace with undamaged rod
- For expansion and control joints, check depth of rod to ensure correct sealant dimensions will be achieved. For very deep joints, two layers of rod may be required to achieve correct joint dimensions
