INNOVATIVE NEW PRODUCTS TO PRESERVE THE ENVIRONMENT
Bostik is committed to offering innovative product solutions which contribute to sustainable development in construction. This is achieved through continuously developing greener products and packaging. Bostik anticipates and exceeds the needs of its customers while minimising environmental impacts.

PROMOTING PRODUCT STEWARDSHIP
Right from the research stage, Bostik integrates health, safety and environmental criteria into each new product development. As a signatory to the National Packaging Covenant, Bostik is firmly committed to reducing the environmental impact of packaging. Further down the line, Bostik applies the same degree of rigour to labeling, preparation of safety documents (safety data sheets). This ensures optimum conditions for the storage, shipment and use of its products. Our relationship with our customers includes technical assistance aimed at optimising the use of our products for the greater protection of people and the environment.

REDUCED IMPACT OF COMPANY ACTIVITIES ON THE ENVIRONMENT
All Bostik production sites monitor the characteristics of emissions and waste rigorously and systematically. Performance indicators provide a regular assessment of the environmental performance. Action plans are continuously updated and implemented to reduce the impact on the environment.

PROMOTING ENVIRONMENTAL MANAGEMENT
Systems are in place to manage Bostik’s ISO 9001 safety and quality performance. Systems are based on a continuous improvement process.

LOCAL AUTHORITY
The Green Building Council of Australia developed the Green Star environmental rating system for building and construction. A growing number of projects are adopting these green building processes to promote a healthier environment, minimise global impacts and improve the satisfaction and living environments of the population. Builders, re-modelers, engineers, product manufactures, architects and consumers alike are using these guidelines to create new approaches to construction and remodeling projects that will benefit today and the world tomorrow.

PVC Pipe Assembly

PVC Pipe Cement Type N

NON-PRESSURE GRADE
Bostik PVC Pipe Cement Type N is a specially formulated welding cement for joining unplasticized PVC (PVC-U) pipes and fittings in non-pressure piping systems.

CLASSIFICATIONS
- Meets Australian & NZ Standards AS/NZS 3879
- Suitable for use in contact with drinking water applications - meets AS/NZS 4020

FEATURES
- WaterMark certified as per the Plumbing Code of Australia
- Colour coded packaging range for easy product selection
- Natural bristle brush applicator for easy application
- Ready to use - no mixing required
- Good application viscosity - easily applied with minimal dripping

RECOMMENDED FOR
- Generally recommended for joining pipes 100mm or less in diameter
- Jointing PVC-U pipes to PVC-U fittings in non-pressure plumbing applications
- Jointing PVC-U pipes to ABS fittings in non-pressure plumbing applications

PVC Pipe Cement Type P

PRESSURE GRADE
Bostik PVC Pipe Cement Type P is a specially formulated welding cement for joining unplasticised PVC (PVC-U) pipes and fittings in pressure piping systems.

CLASSIFICATIONS
- Meets Australian & NZ Standards AS/NZS 3879
- Suitable for use in contact with drinking water applications - meets AS/NZS 4020

FEATURES
- WaterMark certified as per the Plumbing Code of Australia
- Meets the stringent requirements for pressure applications
- Colour coded packaging range for easy product selection
- Natural bristle brush applicator for easy application
- Ready for use - no mixing required
- Good application viscosity - easily applied with minimal dripping

RECOMMENDED FOR
- Jointing PVC-U pipes to PVC-U fittings in pressure plumbing applications, i.e. irrigation and reticulation systems
- Bonding PVC-U sheets

PVC Priming Fluid

Bostik PVC Priming Fluid is a solvent based fluid formulated for cleaning and priming of PVC pipes and fittings prior to application of PVC Pipe solvent cements.

CLASSIFICATIONS
- Meets Australian & NZ Standards AS/NZS 3879
- Suitable for use in contact with drinking water applications meets AS/NZS 4020
- WaterMark certified as per the Plumbing Code of Australia

FEATURES
- WaterMark certified as per the Plumbing Code Australia
- Colour coded packaging for easy product selection
- Ready to use - no mixing required
- Easy application with supplied Bostik applicator

RECOMMENDED FOR
- Use prior to application of both Type N & P Bostik PVC Pipe Cements

Before commencing joining procedure ensure all Personal Protective Equipment (PPE) is worn according to the Material Safety Data Sheet (SDS) and follow all safety instructions marked on the bottle. When joining, the joining procedure should be followed to AS/NZS 3879 ensuring the pipe has been cut square and deburred. Use the Bostik applicators to wipe joints to be bonded, ensuring that the surfaces have been wiped thoroughly and deglossed prior to fitting. When using Bostik Red Priming Fluid a noticeable pink stain will remain where pipes and fittings have been correctly primed.
NON PRESSURE
Bostik PVC Pipe Cement Type N Slow setting is a specially formulated welding cement for joining unplasticised PVC (PVC-U) pipes and fittings in non-pressure piping systems.

CLASSIFICATIONS
• WaterMark certified, Meets AS/NZS 4020

FEATURES
• WaterMark certified as per the Plumbing Code of Australia
• Colour coded packaging range for easy product selection
• Natural bristle brush applicator for easy application
• Ready to use - no mixing required
• Slower drying profile than standard type N grade allows for longer working time
• Good application viscosity - easily applied with minimal dripping

RECOMMENDED FOR
• Ideal for use onklarge diameter pipes, generally 100mm or greater in diameter
• Jointing PVC-U pipes to PVC-U fittings in non-pressure plumbing applications
• Commercial and domestic drainage applications: storm water and sewerage drainage systems
• Jointing PVC-U electrical conduit for electrical applications
• Bonding PVC-U sheets

### Roof & Gutter Premium Silicone

**NEUTRAL CURE**
Bostik Roof & Gutter (100%) silicone is a one component, mid modulus, neutral curing silicone which provides excellent adhesion to many common substrates.

**CLASSIFICATIONS**
Translucent and Grey are suitable for drinking water as per Australian standards AS/NZS 4020 and meet ATS 5200.014:2004 standards.

**FEATURES**
- Excellent adhesion properties
- Stays permanently flexible
- Joint movement capabilities ±Suitable for interior and exterior applications
- Unaffected by rain, snow, extreme temperature change
- Ultra violet resistant
- Suitable for water potable applications*
- Translucent & Grey tested to AS/NZS 4020*

**RECOMMENDED FOR**
- Plumbing roofing applications
- Metal roofing systems
- Metal water tanks
- Spouting/flushing and down pipes
- Lap joints in Zincalume, Colorbond and other decorative sheet metal
- Skylights and metal and PVC flues and extraction units
- Pipe or sprinkler system penetrations
- Air conditioning ducting and sheet-metal fabrications
- General purpose adhesive and sealant for building materials such as steel, aluminium, glass, concrete, brick, ceramic, terracotta roof tiles

Silicones & Sealants

Kitchen & Bathroom Silicone

ACETIC CURE
Bostik Kitchen & Bathroom is an acetic (acetoxy) curing sealant. It is specially formulated to resist mildew when exposed to prolonged hot and humid environments.

FEATURES
• Flexible silicone rubber
• Anti-fungal fungicide added
• Joint movement capabilities ± 25%
• Maintains a waterproof flexible joint
• Acetoxy silicones stay clearer than oxime silicones over time
• Excellent UV resistance

RECOMMENDED FOR
• Sealing in wet areas
• Bathtubs and showers
• Glass to glass screens
• Ceramic tile
• Most laminated surfaces
• Fibre glass
• Rimless sinks
• Bathroom & kitchen fixtures
• Vitreous toilet pans
(Note: Not to be used on marble, granite or stone)

Neutral Cure

Bostik Kitchen & Bathroom is a neutral (oxime) curing silicone that resists mildew in hot and humid environments.

FEATURES
• Flexible silicone rubber
• Anti-fungal fungicide added
• Joint movement capabilities ± 25%
• Maintains waterproof flexible joint
• Low odour
• Will not corrode galvanised/zinc coated steel or attack concrete

RECOMMENDED FOR
• Ideal for wet areas of building dwellings
• Kitchens, bathrooms, toilets, showers, basins and vanity units
• Sealing bathtubs and shower stalls
• Glass partitions
• Ceramic tile
• Vitreous enamel
• Most laminated surfaces
• Fibre glass
• Rimless sinks

Bostik ZBond 616

Bostik ZBond 616 is a one component, non-flowing, neutral cure, mid-modulus silicone sealant. It cures by absorption of atmospheric moisture to form a flexible and durable elastomeric sealant.

FEATURES
- ZBond® 616 has been developed for use in glazing weather seals. It offers good adhesion to glass, coated aluminium & steel frames and panels, fibreglass, masonry and concrete.
- Excellent resistance to UV, weathering, ozone, vibration, moisture and temperatures.
- The thixotropic nature of this product ensures that it will not slump in typical construction joints.

RECOMMENDED FOR
- Weathering seals between glass and aluminium.
- Back glazing between timber and glass.
- Perimeter seals between aluminium window frames and brick and masonry.
- Air seals in concrete panels.
- General glazing and sealing applications.
**Bostik 6S**

**SANITARY AND TILE SILICONE**

Bostik 6S is a one component, non-flowing neutral cure, mid modulus silicone sealant. It cures by absorption of atmospheric moisture to form a flexible and durable elastomeric sealant.

**CLASSIFICATIONS**

The thixotropic nature of this product ensures that it will not slump in typical construction joints.

**FEATURES**

- Bostik 6S contains an effective fungicide, to reduce the growth of mould and mildew. Because it is a neutral curing system, it is more pleasant to work with particularly in a confined space. It also offers excellent adhesion to powder coated metal. The thixotropic nature of this product ensures that it will not slump in typical construction joints.

**RECOMMENDED FOR**

- Bathrooms, fibreglass spa units, shower screens, ceramic tiles
- Tiles and grout areas. (For granite, marble and some porous stones, use/refer to Bostik SCLM data sheet)
- Around edges of kitchen bench tops
- Edges of splash backs (*Not to be used on the back of splash backs, refer to Bostik V60*)
- Cool rooms

SANITARY AND TILE SILICONE
Bostik Multi Purpose Silicone Sealant is ideal for exterior use, creating flexible, waterproof and weather resistant seals around your home. It can also be used for interior applications.

FEATURES
- Permanently flexible
- Suitable for interior and exterior applications
- Waterproof
- Excellent adhesion properties
- Unaffected by rain, snow, extreme temperature change and constant ultra violet exposure
- Non corrosive
- Environmentally friendly, low VOC

RECOMMENDED FOR
- Suitable for: Most exterior and interior sealing applications such as sealing of air conditioning, skylights, building materials (concrete, brick, masonry, aluminium, steel) and weatherproofing (roof and gutter systems)
Silicones & Sealants

Xtreme Seal & Fix

Bostik Xtreme Seal & Fix® is a high performance, flexible sealant and high strength adhesive in one. It cures to form a permanent, flexible seal and tough bond. Bostik Xtreme Seal & Fix® does not require any primer to adhere to sound, dust-free, degreased surfaces.

FEATURES
- Bonds and seals just about anything to everything, including wet surfaces
- High bond strength
- Permanent flexible seal
- Up to +/-20% joint movement
- Waterproof and draught-proof seal when fully cured
- Sandable and paintable once cured
- Non corrosive to metals
- Odourless
- Environmentally friendly, Low VOC
- Up to +/-15% joint movement (Clear)
- Water Potable to AS/NZS 4020 (Clear only)

RECOMMENDED FOR
- Suitable for: Wood, concrete, brick, plaster, glass, ceramics, metals, rigid PVC, insulation boards and foam polystyrene, roof tiles, skirting boards, gutters, downpipes, masonry, wooden and metal doors, window frames, boats, caravans, bodywork, trailers, greenhouses and conservatories

Dampfix Gold is a one part, highly elastic, Class 3, water-based polyurethane waterproofing membrane system that meets the requirements of AS3740 by complying with AS/NZ 4858. The Dampfix Gold waterproofing membrane system is specifically formulated for application on graded substrates that provide positive falls to drainage outlets.

**FEATURES**
- Class 3, high elasticity
- Fast drying
- Early access for following trades
- Tile next day in most conditions
- May be tiled directly onto with approved ASA adhesive
- Reinforced with clump free fibres
- No mixing
- High resistance to detergents and bleach
- Will not re-emulsify after curing
- Does not embrittle with age
- Excellent adhesion to concrete; rendered masonry; wet area plasterboard; FC sheet and plywood

**RECOMMENDED FOR**
- As a waterproofing membrane to internal wet area shower, bathroom, kitchen, laundry & toilet areas to AS/NZ 3740
- As waterproofing membrane to external balconies, rooftops & podium levels to AS/NZ 4654.2
- All applications to be covered by tile or other surface wearing and protective systems by following trades
- Suitable for concrete: cement rendered masonry; FC sheeting; water resistant plasterboard; and structural plywood (Type A Stamped «PAA JAS-ANZ» to AS/NZS2269-2004) substrates

Moisture Seal is a two part epoxy for priming under flooring adhesives and waterproofing membranes. An approved moisture / vapour barrier suitable for direct contact with drinking water. The solvent free composition is compatible with a wide range of coverings including the Bostik Ultraset flooring adhesives and Dampfix waterproofing ranges.

**FEATURES**
- Accepts a wide range of coverings
- Excellent bond to a range of substrates
- Easy 1:1 mixing ratio (by volume)
- Conforms to ASTM E96 water vapour transmission (negative pressure) tests
- Approved for direct contact with potable (drinking) water (AS4020:2005)
- Withstands hydrostatic water pressure up to 25m or 250kPa

**RECOMMENDED FOR**
Suitable for: Concrete, fibre cement, stone, masonry, structural plywood, metal, brick, AAC

Waterproofing Systems

Dampfix PU

Dampfix PU polyurethane waterproofing membrane is specifically formulated for applications where the waterproofing membrane is to be covered by tiling systems laid on an unbonded reinforced screed to falls (ref: Guide to the installation of Ceramic Tiles - AS3958.1)

**FEATURES**
- Provides a tough elastomeric waterproofing membrane when fully cured
- Minimum dry film thickness achievable in 2 coats
- Does not contain bitumen
- Will not bleed through porous materials such as marble, natural stone and slate tiles
- Will not re-emulsify when immersed, after full cure
- One component, ready to use
- Easy to apply
- Excellent bond strength to most primed common building substrates
- Reaches sufficient cure in 72 hours allowing for fast placement of mortar beds and screeds

**Suggested Colour**
- Grey

Primeseal Rapid

Primeseal Rapid is one component, rapid drying, water-based polyurethane, Class 3 waterproofing membrane system that meets the requirements of AS3740 by complying with AS/NZ 4858.

**FEATURES**
- Class 3, high elasticity
- Fast drying. Recoat in 1-2 hours @ 22 °C & 50% RH. Flood test after 24 hours @ 22°C / 50% RH.
- Can be tiled after 4-6 hours @ 22°C / 50% RH in non-critical areas.
- Compatible for tiling with Bostik ASA tile adhesive system.
- Excellent adhesion to concrete; rendered masonry; wet area plasterboard; FC sheet & plywood. Can be applied to damp substrates (provided no free surface water)
- Brush or roller applied
- Designed for commercial and residential application

**Suggested Colour**
- Blue

<table>

</tbody>
</table>

**RECOMMENDED FOR**
- As a waterproofing membrane between the structural substrate and the reinforced unbonded tile screed in both internal and external applications
- As a waterproofing membrane to internal wet area shower, bathroom, kitchen, laundry and toilet areas to AS/NZ3740
- As a waterproofing membrane to external balconies and podium levels to AS/NZ4654.2
- All horizontal applications to be covered by a reinforced unbonded screed to falls prior to the application of tile or other surfaces wearing and protective systems by following trades

**RECOMMENDED FOR**
- As a waterproofing membrane under tile to internal wet area shower, bathroom, kitchen, laundry & toilet areas when installed to AS/NZ 3740.
- As a waterproofing membrane under tile or other wearing surface systems to external balconies, rooftops & podium levels when installed to AS/NZ 4654.2.
- All applications to be covered by tile or other protective system.
- Suitable for concrete; cement rendered masonry; FC sheeting; water resistant plasterboard; and structural plywood (Type A Stamped “PAA JAS-ANZ” to AS/NZS 2269-2004) substrates.
Primeseal Immersed Rapid is a rapid setting two component water based, acrylic modified cement-based, Class 3 waterproofing membrane system that meets the requirements of AS3740 by complying with AS/NZ 4858.

This waterproofing membrane system is specifically formulated for application on graded substrates that provide positive falls to drainage outlets. Overlaying tiling systems must comply with Guide to the Installation of Ceramic Tiles (AA 3958:1).

**FEATURES**
- Class 3, high elasticity.
- Fast drying. Recoat in 1-2 hours @ 22°C & 50% RH. Flood test after 24 hours @ 22°C / 50% RH.
- Can be tiled after 4 hours @ 22°C / 50% RH in non-critical areas.
- Compatible for tiling with Bostik ASA tile adhesive system.
- Excellent adhesion to concrete; rendered masonry; wet area plasterboard; FC sheet & plywood; Can be applied to damp substrates (provided no free surface water).
- Brush, roller or trowel applied.
- Designed for commercial and residential application.

**RECOMMENDED FOR**
- As a waterproofing membrane under tile to internal wet area shower, bathroom, kitchen, laundry & toilet areas when installed to AS/NZ 3740.
- As a waterproofing membrane under tile or other wearing surface systems to external balconies, rooftops & podium levels when installed to AS/NZ 4654.2.
- As an exposed waterproofing membrane to external applications subjected to light pedestrian traffic only.
- Suitable for concrete; cement rendered masonry; FC sheeting; water resistant plasterboard; and structural plywood (Type A Stamped “PAA JAS-ANZ” to AS/NZS 2269-2004) substrates.

Dampfix Bandage

Dampfix Bandage is a premium reinforcing tape designed to be used with Dampfix waterproofing membranes. It is a high performance bond breaker and joint isolation system. The prefabricated open weave material, strengthened with an elastomeric rubber reinforcing layer is designed to maximise elongation in critical areas. The membrane does not bond to the rubber resulting in a high elongation and flexible bond breaker in the finished joint system.

**FEATURES**
- Puncture resistant reinforced layer
- High strength and excellent tear resistance
- Open flexible weave = fast and easy wetting with maximum bond to substrate
- Embossed crease for easy fold in junctions
- Useful measurement marks
- Print face is release treated so membrane de-bonds easily
- Accommodates movements
- Unlike bedding cloth mesh, does not reduce the class of membrane
- Complies with AS3740 and AS4654 requirements
- Suitable for Class II and III membranes

**BENEFITS**
- Resistant to damage by following trades
- Less risk of failure in critical areas
- Quicker installation than traditional sealant + tape
- Open flexible weave excellent bond to substrate and no chance of dry cloth tapes
- No need to wait - install membrane almost immediately
- Lower risk of performance / compliance issues
- Sealant is isolated from membrane so compatibility issues are avoided and preferred sealant may be used
- May be used for joint patching without removing damaged membrane.

**RECOMMENDED USES**
- Vertical and horizontal joints and junctions
- On any substrate suitable for chosen Dampfix or Primeseal membrane
- Sheet joints
- Compatible with all Dampfix or Primeseal membranes
- Static cracks in concrete slabs interior (AS3740) and exterior (AS465)

Waterproofing Systems
Waterproofing Systems

**Multiprime**

General purpose primer designed for use on porous surfaces. Fully compatible with ASA tile adhesive and most Bostik waterproofing membranes. Acrylic backbone allows it to be used outdoors. ASA Multiprime is a milky pink liquid.

**FEATURES**
- Improves bond
- Improves working times
- Reduces membrane pin-holes
- Seals in minor dust contamination
- Helps improve consistency of surface

**RECOMMENDED FOR**
- Priming porous surfaces before tiling or waterproofing
- Outdoors and indoors
- Floors and walls
- Porous surfaces

Sealants & Polyurethanes

Seal N Flex 1
Bostik Seal N Flex 1 is a low modulus, one component, and Class-A polyurethane sealant. When cured it will form a tough, flexible seal capable of cyclic expansion and compression movement of 100% (± 50%) of the original installed joint width. Bostik Seal N Flex 1 is resistant to normal weathering conditions such as rain, sunlight, snow, sleet, ozone, atmospheric contamination and pollution. Its excellent weatherability enables it to retain its original properties after years of exposure, CSIRO RILEM LONG-TERM SEALANT DURABILITY STUDY DBCE Doc. 97/196 (M0).

**FEATURES**
- Low modulus 100% (± 50%)
- Excellent durability
- One component, no mixing required
- Australian made
- 12 standard colours
- Acoustic rating
- Paintable (refer limitations)
- Non staining

**RECOMMENDED FOR**
Sealing joints in:
- Insitu concrete & render.
- Precast and tilt up panels.
- Brickwork & block work.
- Plasterboard face and paper lined recessed edges.
- Fibre cement sheet.
- Aluminium windows.
- Granite, sandstone and marble.
- GRC, Fibreglass & most specialty panel systems

The colours on this chart have been matched as closely as possible to actual sealant colours and should be used as a guide only.
**Bostik Seal N Flex FC**

*Bostik Seal N Flex FC* is a high performance fast cure one component polyurethane sealant. When cured it will form a tough, flexible seal bond capable of cyclic, expansion and compression movement. Joints or fabrications formed with this sealant can be expected to extend and compress a total of 50% (±25%) of original joint dimensions to ASTM C719.

**FEATURES**
- Fast tack free time and cure rate
- High bond strength
- A medium/high modulus product, which forms a resilient and permanently elastic seal
- Excellent adhesion to most materials including metals, concrete, brick, wood, plasterboard, GRC & CFC
- Paintable (refer paintability section)
- Non-slumping
- Resistant to fungal attack to AS1157.2
- Potable water approval to AS4020

**RECOMMENDED FOR**
- For sealing floor joints, granite, sandstone and marble pointing, GRC, fibreglass & most specialty panel systems
- Trafficable – Plats, stairs, roads, runways, aprons and pavements
- Vertical–Precast, Block work, plasterboard and most common building substrates.
- Pick resistant – Prisons, cells, schools and public amenities.
- Chemical resistant – Service stations, hangers, aprons and bunded areas.
- Potable water tanks

Fireban One

Bostik Fireban One is a fire rated, intumescent, low modulus, one component, and Class A polyurethane sealant. When cured it will form a tough, flexible fire rated seal capable of cyclic expansion and compression movement of 50% (+25%) of the original installed joint width. Bostik Fireban One is resistant to normal weathering conditions such as rain, sunlight, snow, sleet, ozone, atmospheric contamination and pollution. Its excellent weatherability enables it to retain its original properties after years of exposure, refer to the CSIRO RILEM LONG TERM SEALANT DURABILITY STUDY DBCE Doc. 97/196(M).

**FEATURES**
- Fire Rated up to 4 hrs (1530.4-2005)
- One component, no mixing required
- Low modulus 50% (+25%)
- Excellent durability
- Australian made
- Paintable (refer limitations)
- Non staining
- Does not support fungal growth

**RECOMMENDED FOR**
Fire & Acoustic Rated sealing of joints in:
- In situ concrete floors and walls.
- Precast and tilt up panels.
- Brickwork & blockwork.
- Rendered masonry.
- Plasterboard (Fire rated &/or Acoustic rated)
- Fibre cement sheet (Fire rated &/or Acoustic rated)

Firecaulk

Bostik Firecaulk is a single component, non-sag, fire rated, acrylic based gunnable sealant. A general purpose product for construction joints and the sealing of service penetrations in plasterboard, concrete floors and masonry wall constructions. Bostik Firecaulk is a gun grade acrylic based sealing compound specifically manufactured for sealing low movement interior joints (up to +/- 25%) in masonry and plasterboard to provide a fire barrier for periods up to 4 hours.

**FEATURES**
- Fire rating for gaps up to 40mm.
- Designed for Australian conditions.
- Good flexibility joint movement +/- 25%
- One part no mixing required.
- Very easy to apply and gives a smooth finish.
- Smooth gunnability and tool off finish.
- Low odour.
- Non-toxic.
- Priming not normally required.
- Water clean up.
- Prevents the passage of hot gases.
- Paintable after 24 hours at 20°C.

**RECOMMENDED FOR**
- Sealing of gaps around pipes, cables, ducts and services which penetrate fire rated walls and floors.
- Installation of fire rated sealant in concrete walls and floors, and plasterboard walls.
- For vertical and horizontal joints, interior.
- Application requiring acoustic properties or STC rating.
- Perimeter sealing of door and window framing interior.

Bostik Fire Rated Expanda Foam Gun Grade is a one component, self expanding, ready to use professional gun applied polyurethane foam. It will not shrink and cures to an airtight, moisture resistant seal. Bostik Fire Rated Expanda Foam Gun Grade meets criteria for AS1530.4-2005 and AS 4072

**FEATURES**
- Fire retardant up to 4 hours
- High yield (up to 30L) and low post expansion
- Precise dosage with Bostik Expanda Designer Gun
- Efficient seal against smoke and gas
- Excellent adhesion on most substrates (except Teflon, PE, and PP)
- Excellent thermal and acoustical insulation
- High bonding strength
- Very good filling characteristics
- Excellent stability: no shrink or post expansion
- Can be painted after full cure (refer caution)

**RECOMMENDED FOR**
- Fire retardant installation of window and door frames
- Fire and smoke retardant sealing of connections between partition walls, ceilings and floors
- Filing of cavities
- All applications where fire retardant characteristics are required

Fire Rated Expanda Foam is a one component, self expanding, ready to use polyurethane foam. It will not shrink and cures to an airtight, moisture resistant seal. The straw adapter included aids in easy application, especially to fill gaps of all dimensions in the most difficult locations. Bostik Fire Rated Expanda Foam meets criteria for AS1530.4-2005 and AS 4072

**FEATURES**
- Fire retardant up to 4 hours
- Adaptor allows product to be applied at any angle - great for tight areas.
- Efficient seal against smoke and gas
- Excellent adhesion on most substrates (except Teflon, PE, and PP)
- Excellent thermal and acoustical insulation
- High bonding strength
- Very good filling characteristics
- Excellent stability: no shrink or post expansion
- Can be painted after full cure (refer caution)

**RECOMMENDED FOR**

Bostik No More Nails is a general purpose construction adhesive suitable for bonding a wide variety of building materials. Its superb bond strength is ideal for demanding situations.

**FEATURES**
- Easy to gun and easy to apply
- Fast grab
- Bonds to a wide variety of construction and building materials
- Excellent slump resistance
- Interior & exterior applications
- Polystyrene safe

**RECOMMENDED FOR**
- General Purpose construction adhesive
- As a contact adhesive for the installation of wall and floor panels
- Metal, timber & other sheets of plan materials to concrete, plaster or other rigid surfaces
- Most bonding applications where high strength, gap filling one component adhesive is required
- Suitable for timber, metal, cementitious and plaster sheets to timber or metal studs
- Installation of battens or other fixings to brick, masonry or concrete walls
- Suitable to use on foamed polystyrene

---

**No Nails Instant**

Bostik No Nails Instant is a premium, fast acting, multi-purpose construction adhesive that creates a high strength bond, eliminating the need for nails and screws in many decorating, refurbishment, building and DIY applications. Being water based, Bostik No Nails Instant has a very low odour. It is safe, easy to use and environmentally friendly.

**FEATURES**
- Instant grab
- High bond strength
- Non drip
- Good for tight spaces, horizontal or vertical applications
- Suitable for both exterior and interior applications
- Paintable after 24 hours
- Water clean up
- Environmentally friendly, low VOC

**RECOMMENDED FOR**
- General purpose, high strength, instant grab construction adhesive
- Suitable FOR: Polystyrene, wall panels, architraves, ceramic tiles, timber, metal, aluminium, glass, some plastics, cementitious and plaster sheets, metal studs, brick, masonry and concrete walls.

General Adhesives

Xtreme Fix

Bostik Xtreme Fix is a high performance construction adhesive that grabs instantly to most surfaces. It is suitable for any small or big jobs on hand.

FEATURES
- Bonds most surfaces, including impervious or damp surfaces
- Can be used in most weather conditions
- Superior strength
- Permanent flexible bond that is able to withstand shock and vibration
- Paintable after fully cured
- Ideal for heavy jobs
- Non corrosive to metals
- Odourless
- Environmentally friendly, Low VOC

RECOMMENDED FOR
- Suitable for: Wood, concrete, brick, plaster, glass, mirrors, ceramics, metals, rigid PVC, insulation boards and foam polystyrene, roof tiles, skirting boards, gutters and downpipes

Titan Bond

Titan Bond Plus is a two component high performance, solvent-free epoxy adhesive that dries to an off-white colour. It has a unique property that displaces water then bonds to material.

FEATURES
- Can be applied in fresh, chlorinated or salt water as well as in dry surfaces.
- Bonds to just about anything and everything
- Perfect for quick repair jobs and other plumbing applications

Bostik Fill-A-Gap Flexible is a highly flexible, anti-fungal, mildew resistant acrylic gap sealant. It offers excellent adhesion strength when cured and is more flexible than conventional acrylic gap sealant with minimal shrinkage.

**Features**
- Anti-fungal and anti-mould formulation
- Permanently flexible (+/- 10% joint movement)
- Non slump
- Easy colour match in 7 popular colours
- Cured sealant will dry to a similar colour as when wet
- Smooth finish with low shrinkage
- Water clean up
- Good adhesion to most building materials
- Interior/exterior applications
- Environmentally friendly, Low VOC

**Recommended for**
- Suitable for: Bathroom, kitchen and laundry, skirting boards, architraves, plasterboard
- Low movement joints, between light partition walls, and crack filling prior to painting.
- Brickwork, concrete, aluminum, wood, glass

The colours on this chart have been matched as closely as possible to actual sealant colours and should be used as a guide only.

Expanda Foam

Bostik Expanda Foam is one component, multi purpose polyurethane foam that will not shrink and cures to an airtight, moisture resistant seal. The straw adapter included with each can aids in easy application, when filing gaps of all dimensions in the most difficult locations.

FEATURES
- Ozone Safe
- Exterior or interior use
- Fills large or small gaps
- Seals, fills, bonds, insulates
- Cured foam can be cut, sanded, plastered or painted to a neat finish

RECOMMENDED FOR
- Expanda Foam is a great insulator against heat and cold. It greatly reduces noise, dust and draughts, and block access by rodents.
- The foam has powerful adhesive properties, bonding well to timber, brick, concrete, galvanised steel, aluminium, glass, fibre cement sheet and plasterboard

Never-Seez® Regular Grade is a high quality and extreme pressure lubricant formulated to protect metal parts against rust, corrosion and seizure. Copper and graphite particles in a special grease protect parts even in high heat, high pressure and corrosive environments.

**Features**
- Keeps parts working longer with less wear
- Minimizes parts replacement costs
- Enables faster disassembly when repairs are needed (even after exposure to high temperatures)
- Protects against carbon fusion
- Resists alkaline solutions, most chemical and acid vapors, road salt, steam, salt water, iodized water
- Prevents galling on steel to stainless steel, titanium, magnesium, and other hard metals

**Recommended for**
- Suitable for: Nuts, bolts, screws, shafts, pipe fittings, gaskets, boom guides, press fit assemblies, valve assemblies, taps and drills, pump mountings, packing gland, chain drive, metal fittings, machinery

Never-Seez® Pure Nickel Special is a high temperature and extreme pressure lubricant containing flake particles of pure nickel, graphite and other additives in a special grease carrier to enhance anti-seize performance.

**Features**
- Excellent heat dispersing qualities
- Minimizes corrosion
- Prevents seizure at high temperatures
- Resists galvanic action between dissimilar metals
- Enables fast disassembly—even after high temperature exposure
- Prevents galling on steel to stainless steel, titanium, magnesium and other hard metals
- Resists alkaline solutions, most chemical and acid vapors, road salt, steam, salt water, iodized water

**Recommended for**
- Suitable for: Fittings, fasteners exposed to high temperatures in steel mills, power plants, nuclear plants, stainless steel pipe fittings, flanges, pump fittings
- Fasteners in exhaust manifolds and boilers
- Steam generators
- Assembly of dissimilar metals

Bostik N40 non-porous substrate primer is a one component non-staining solvent-based primer/cleaner for promoting the adhesion of polyurethane sealants to non-porous substrates such as rigid plastics and most metals.

**FEATURES**
- Fast drying
- Promotes strong adhesion
- One part - no mixing required

**APPLICATION INSTRUCTIONS**
- Prior to applying Bostik N40 Primer the substrate must be sound, dry, clean and free from any dust, residue or contamination and meet the requirements of substrate preparation detailed in the applicable Sealant or Membrane Technical Data Sheet. Bostik primers, sealants or membranes must not be applied to unpredictable absorptive surfaces such as marble, limestone or granite unless a standard of appearance has been agreed on as a result of testing for stain and/or discoloration.

Primers - Cleaners

**Handy Wipes**

Bostik Handy Wipes have been specially formulated to quickly and effectively remove sealant, tar, dirt, grease, oil, adhesives, paint and ink from tools and equipment.

**FEATURES**

- Tough on dirt and grease
- Gentle on hands and skin
- Two sides: Tough scrub to lift hard to remove product and a smooth side to gently wipe away
- Won't scratch or mark
- Effectively removes uncured adhesive off tools and surfaces
- Extra large towels
