# Grout & Sealant Color Guide

The Bostik Grout & Sealant Color Guide is provided for initial color selection. Colors may vary due to job site conditions, absorption of tile, mixing ratio, installation method or type of grout or sealant.

## Also Available

In 35 Bostik Colors!

### PURE SILICONE™
- Waterproof sealant
- Permanently flexible
- Fast cure – back free in 30 minutes

### TUB & TILE CAULK™ (SANDED)
- Flexible & water cleanable
- Mild & mildew resistant
- Easy to apply

BOSTIK HOTLINE™
Grout Technology

Breaking it all down

With an unequal track record of technology-driven, performance-proven products, Bostik’s grouts exceed industry standards and deliver exceptional application and cleanability properties.

More than just a grout element, a grout is a critical component of any tile installation systems overall performance. At Bostik, we recognize the importance of grout in an installation, and have developed a range of grout solutions that allow you to select products offering the ultimate in appearance and performance.

High Performance Cement Grout

High performance cement grout offers long-term performance and installation characteristics when compared to a standard cement grout. The grout offers a long-setting time, allowing a quick set time for those jobs that require short downtime and early trafficability. Hydroment® Vivid™ offers superior application properties and exceptional cleanability.

Pre-Mixed Grout

Hydroment® Dry Tile Grout™ (Unsanded), Hydroment® Ceramic Tile Grout™, and Hydroment® Ceramic Tile Grout™ Sanded is a polymer-modified cementitious grout system which offers superior thermal shock resistance and minimal issues with time of set. It provides superior strength and durability with a wide variety of grout colors. Exceeds ANSI A118.8.

Epoxy Grout

Glossy, durable, and with a wide variety of colors, Hydroment® Vivid™ is a rapid curing, premium grade, cementitious grout system which offers superior thermal shock resistance and minimal issues with time of set. It provides superior strength and durability with a wide variety of grout colors. Exceeds ANSI A118.8.

High Performance Epoxy Grout

Hydroment® Vivid™ Technology allows Bostik to precisely control the timing and formation of the chemical and physical matrix of “highly” reactive grout during the curing process.

This advancement in materials science creates a micro structurally dense internal matrix that offers the most durable and easy to clean cement based grout available. This water tight matrix results in a superior grout joint which resists the penetration of liquids and most cleaning agents while also exhibiting best in class efflorescence resistance.

Epoxy Grout technology offers superior stain and chemical resistance which makes them more durable and easier to maintain. Use Bostik EzPoxy™ EzClean™ grout in demanding installations such as hospitals, restaurants, airports, swimming pools and steam rooms.

Standard Cement Grout

Standard cement grout offers an economical solution for grouting tile and stone and is available in standard and custom grades.

**PRE-MIXED GROUT**

- Hydroment® Ceramic Tile Grout™ – Standard is a proven blend of sand, quartz aggregates, portland cement, colored pigments and other special proprietary ingredients. It provides superior strength and durability with a wide variety of grout colors. Exceeds ANSI A118.7. For use in grout joints up to 1".

- Hydroment® Dry Tile Grout™ – Unanded is formulated from standard cement and is available in sanded and unsanded formulations.

- **HYDROMENT® DRY TILE GROUT™**

- Bostik Hydroment® Dry Tile Grout™ (Unsanded) is formulated from standard cement and is available in sanded and unsanded formulations. Exceeds ANSI A118.6 when mixed with water, and ANSI A118.7 mixed with Bostik 425™ Multi-Purpose Acrylic Latex Admixture. For use in grout joints up to 1/8".

**ADDITIVES**

- HybriDrix™ Technology allows Bostik to precisely control the timing and formation of the chemical and physical matrix of “highly” reactive grout during the curing process. This advancement in materials science creates a micro structurally dense internal matrix that offers the most durable and easy to clean cement based grout available. This water tight matrix results in a superior grout joint which resists the penetration of liquids and most cleaning agents while also exhibiting best in class efflorescence resistance.

**DIMENSION® BAZUCCO**

- Dimension® RapidCure™: Rapid Cure, Pre-Mixed, Jointless Grout. A patented, reflective water based, urethane grout. Dimension® RapidCure™ contains micro-glass beads and a translucent, urethane binder that both reflect light as well as act as an anti-patch breakthrough. This creates a variety of aesthetic effects in virtually all color options available today. It may be an epoxy grout, another water based, or traditional tile and stone. It also creates a three dimensional effect within close grout grout installations. It can be used in horizontal joint grout joint widths from 1/8” to 1/2” and vertical joint grout joints from 1/8” to 3/8”.

- **TRUCOLOR® BAZUCCO**

- TruColor® RapidCure™: A proprietary, non-water based, urethane grout. It is called a “color coated” grout because the color is color coated to ensure perfect color consistency every time. It can be used in horizontal joint grout joint widths from 1/8” to 1/2” and vertical wall grout joints from 1/8” to 1/2”.

**HYDROMENT® VIVID™**

- Hydroment® Ceramic Tile Grout™, Hydroment® Dry Tile Grout™, and Hydroment® Ceramic Tile Grout™ Sanded is a polymer-modified cementitious grout system which offers superior thermal shock resistance and minimal issues with time of set. It provides superior strength and durability with a wide variety of grout colors. Exceeds ANSI A118.8.

- Hydroment® Dry Tile Grout™ (Unsanded) is formulated from standard cement and is available in sanded and unsanded formulations. Exceeds ANSI A118.6 when mixed with water, and ANSI A118.7 mixed with Bostik 425™ Multi-Purpose Acrylic Latex Admixture. For use in grout joints up to 1/8”.

- **HYDROMENT® DRY TILE GROUT™**

- Bostik Hydroment® Dry Tile Grout™ (Unsanded) is formulated from standard cement and is available in sanded and unsanded formulations. Exceeds ANSI A118.6 when mixed with water, and ANSI A118.7 mixed with Bostik 425™ Multi-Purpose Acrylic Latex Admixture. For use in grout joints up to 1/8”.

- **TRUCOLOR® BAZUCCO**

- TruColor® RapidCure™: A proprietary, non-water based, urethane grout. It is called a “color coated” grout because the color is color coated to ensure perfect color consistency every time. It can be used in horizontal joint grout joint widths from 1/8” to 1/2” and vertical wall grout joints from 1/8” to 1/2”.

**HYDROMENT® VIVID™**

- Hydroment® Ceramic Tile Grout™, Hydroment® Dry Tile Grout™, and Hydroment® Ceramic Tile Grout™ Sanded is a polymer-modified cementitious grout system which offers superior thermal shock resistance and minimal issues with time of set. It provides superior strength and durability with a wide variety of grout colors. Exceeds ANSI A118.8.
Pre-Mixed Grout

Pre-mixed grout is available in over 150 colors. No mixing, no mess, it’s ready to use. Simply open, stir and apply. Start and stop the job at any time by simply closing the lid tightly. No mix, no fuss. Dimension® RapidCure® and TruColor® RapidCure® offer great chemical and stain resistance and may be exposed to water in just 3 days. Both products offer Clean-As-You-Go™ Technology, which eliminates downtime and speeds up the installation process.

Epoxy Grout

Epoxy grout offers superior stain and chemical resistance which makes them more durable and easier to maintain. Use Bostik’s RapidCure® grout in demanding installations such as hospitals, restaurants, airports, swimming pools and steam rooms.

HydroMent® Vivid™

HydroMent® Vivid™ is a rapid-setting, premium grout designed for demanding, high-performance installations. It offers superior stain and efflorescence protection, and is extremely easy to use. It is based on modified acrylate technology, which allows it to maintain tough, flexible, stain-resistant characteristics, making it an ideal choice for demanding applications such as floors and walls. HydroMent® Vivid™ exceeds requirements of ANSI A118.7. For use in grout joints from 1/16” to 1/2”.

TruColor® RapidCure®

TruColor® RapidCure® is approved for intermittent water submersion after 7 days of cure and full water submersion after 14 days of cure. Unlike other grouts that contain loose color pigments (which can cause staining or be washed away during the installation process), TruColor® RapidCure® has pigment embedded within the grout matrix that offers you the most durable, easy to use, cement-based grout available.

Dimension® RapidCure®

Dimension® RapidCure® (unsanded) is a pre-mixed, high-performance grout designed for demanding, high-performance installations. It offers superior chemical and physical matrix that offers you the most durable, easy to use, cement-based grout available.
Grout Technology
Breaking it all down

With an unequal track record of technology-driven, performance-proven products, Bostik grouts exceed industry standards and are unmatched in ease of cleaning and color dependability.

More than just a design element, grout is a critical component of any tile installation systems overall performance. At Bostik, we recognize the importance of grout in an installation, and have developed a range of grout solutions that allow you to select products offering the ultimate in application and performance.

High Performance Cement Grout

High performance cement grout offers superior stain and chemical resistance which makes them more durable and easier to maintain. Use Bostik B1900™ Epoxy Modified Grout and Mortar Admixture, when mixed with Bostik Hydroment® Ceramic Tile Grout™ (sanded only), to offer great chemical and stain resistance and may be exposed to water in just 3 days. Both products offer Clean-As-You-Go™ Technology, which eliminates down time and speeds up the installation process.

Pre-Mixed Grout

Pre-mixed grout offers high performance cement grout during the curing process. This advancement in materials science creates a micro structurally dense internal matrix that offers you the most durable and easy to use cement-based grout available. This grout is color coated to ensure perfect color consistency every time. It resists the penetration of liquids and most staining agents and only Bostik to offer the highest performance resin system of any pre-mixed grout on the market.
