Dampfix Bandage

REINFORCED BOND BREAKER SYSTEMS

Description

Dampfix Bandage is a premium reinforcing tape designed to be used with Dampfix waterproofing membranes. It is a high performance bond breaker and joint isolation system. The prefabricated open weave material, strengthened with an elastomeric rubber reinforcing layer is designed to maximise elongation in critical areas. The membrane does not bond to the rubber resulting in a high elongation and flexible bond breaker in the finished joint system.

Features

- Puncture resistant reinforced layer
- High strength and excellent tear resistance
- Open flexible weave = fast and easy wetting with maximum bond to substrate
- Preformed options available
- Accommodates movement
- Unlike bedding cloth mesh, does not reduce the class of membrane
- Printed face is release treated so membrane debonds easily
- Useful measurement marks
- Embossed crease for easy fold in junctions
- Complies with AS3740 and AS4654 requirements*
- Suitable for Class II and III membranes

Benefits

- Resistant to damage by following trades
- Less risk of failure in critical areas
- Quicker installation than traditional sealant + tape
- Open flexible weave = excellent bond to substrate
- Open flexible weave = no chance of dry delamination due to inadequate wetting seen with cloth tapes
- Easy placement of corner tiles
- No need to wait - install membrane almost immediately
- May be used for joint patching without removing damaged membrane

Dampfix Bandage

Recommended Uses

- Vertical and Horizontal joints and junctions
- On any substrate suitable for chosen Dampfix Membrane
- Sheet joints
- Compatible with all Bostik Dampfix membranes
- Static cracks in concrete slabs interior (AS3740) and exterior (As4654)
