Dampfix PU
CLASS 3 POLYURETHANE WATERPROOFING MEMBRANE

Description
A one component, highly elastic, class 3, polyurethane waterproofing membrane. Does not contain bitumen and complies with AS/NZS 4858. This 2-coat system can be applied over porous and non-porous substrates. Bostik Dampfix PU is specifically formulated for applications wherein the membrane is to be covered by tiling systems laid on an unbonded, reinforced screed to falls.

Features
- Minimum dry film thickness achievable in 2 coats
- Does not contain bitumen
- Will not bleed through porous materials
- One component, ready to use
- Provides a tough elastomeric waterproofing membrane
- Will not re-emulsify when immersed, after full cure
- Easy to apply
- Excellent bond strength to most primed common building substrates
- Reaches sufficient cure in 72 hours, allowing for fast placement of mortar beds & screeds.

Application
- Apply by brush, roller or trowel.
- Should not be applied in excess of 1.5mm thick per coat.
- Apply 2nd coat as soon as possible at least 24 hours after the 1st coat.
- The membrane should be protected after application during cure for a minimum of 72 hours.

Preparation
- Appropriate preparation is vital for all waterproofing (refer to TDS)
- All substrates must be primed to avoid pinholing
- Preparation requirements will depend on the situation. Refer to Technical Data Sheet for more information (including bond breaker requirements)
## RECOMMENDED USES

<table>
<thead>
<tr>
<th>Situation</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Showers</td>
<td>Balconies</td>
</tr>
<tr>
<td>Bathrooms</td>
<td>Rooftops</td>
</tr>
<tr>
<td>Kitchens</td>
<td>Laundries</td>
</tr>
</tbody>
</table>

**Substrates**
- Concrete
- Rendered Masonry
- Screed
- Fibre Cement
- Wet Area Plaster Board
- Marine Plywood

Notes: Not approved for immersed or permanently wet installations

## TILE ADHESIVE COMPATIBILITY

<table>
<thead>
<tr>
<th>Conflex</th>
<th>Maxiflex</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ultra Mastik</td>
<td>Megafix</td>
</tr>
<tr>
<td>Superglue</td>
<td>Excelflex</td>
</tr>
<tr>
<td>Asaflex 2-part</td>
<td></td>
</tr>
<tr>
<td>When adhesive is used with Megalastic</td>
<td></td>
</tr>
<tr>
<td>Prontofix</td>
<td>Superfixall</td>
</tr>
</tbody>
</table>

A minimum class C151 adhesive is required. Higher performance adhesive may be needed depending on the installation requirements. Always check that the adhesive is suitable for the intended installation.

## COVERAGE

Apply in 2 coats each 750 microns thick (wet film). A 15L pail will cover approximately 10m² in two coats (1500 microns total wet film thickness).

## DRYING TIME

<table>

</table>

## IMPORTANT NOTES

Always refer to Technical Data Sheet and MSDS. Waterproofing must be installed by a competent, licensed professional. If there is any doubt contact Bostik before work commences.
