ACOUSTIC SEALANT
WATER BASED ACOUSTIC ISOLATION SEALANT

Date: 18 December 2014

YOUR SMART ADVANTAGES
- Suitable for use on timber frame plasterboard walls which achieve performances up to STC 60
- Stays flexible
- Water clean up
- Low VOC

USES
- Perimeter sealing around framing layers
- Interior joint sealant (±10% movement)

*D Surface to be sealed must be dry and free from frost.

DIRECTIONS FOR USE
Joint design must conform to manufacturer’s recommendations and NZBC requirements. Joints should not be smaller than 4mm wide and no larger than 12mm wide to achieve maximum joint performance.

SURFACE PREPARATION
Always ensure that the surfaces to be sealed are dry and free from oil, dirt and grease. When doing joints, masking gives a neater finish.

APPLICATION
Joints:
Cut the nozzle to the desired width, cut the tip off the sausage and attach nozzle. Apply an even bead ensuring good contact between the sealant and the substrate. Immediately tool the bead to ensure a good finish and remove masking tape. This must be done before the product skins.

Perimeter sealing:
Cut the nozzle to a 5mm width, cut the tip off the sausage and attach nozzle and insert in sausage gun. Apply a 5mm bead around the perimeter of frame. Fit the lining so that it is bedded onto the bead. This must be done before the product skins.

LIMITATIONS
- Joints should not be smaller than 4mm wide and no larger than 12mm wide to achieve maximum joint performance.
- Interior use only
- Maximum ±10% joint movement

CLEANING
Remove excess sealant using a clean cloth or polyethylene scraper. Cured sealant can only be mechanically removed. Clean tools and hands with water.

STORAGE AND SHELF LIFE
Store in a cool dry place below 25°C and out of direct sunlight. Shelf life is 12 months from the date of manufacture when stored as directed.
ACOUSTIC SEALANT

DISPOSAL

Empty containers may be disposed via local landfill. If spilled, absorb with clay, sand or earth. Collect and seal in properly labelled metal container. Dispose of according to local authority regulations. Do not dispose of down drains or into local waterways.

PRECAUTIONS IN USE

Complete details on each of the products mentioned are available on the product Safety Data Sheets. To ensure no harm is caused to persons using Bostik products, it is recommended that all concerned read the appropriate Safety Data Sheets. Visit www.bostik.co.nz for copies.

Acoustic Sealant is not classified as Dangerous Goods or as a Hazardous Substance. The product however, should be used in accordance with good occupational, health and safety practices.

For emergency information contact the National Poisons Information Centre, phone 0800 764 766 (0800 POISON) or CHEMCALL, phone 0800 243 622.
