**DESCRIPTION**

SL-150™ is a fast setting, self-leveling underlayment that can be used to create a smooth, flat or level surface prior to the installation of floor coverings. Its working time, low shrinkage and superior leveling properties make it the ideal product for demanding applications on, above or below grade.

**PRODUCT FEATURES**

- Fast return to service; walkable in just 1-2 hours
- Can be installed from 1/4” - 1” neat
- Maintains healing and pour merging properties for up to 15 minutes
- Fast install for ceramic tile - 4 hours
- Contributes points to LEED™ certified projects
- Mold and mildew resistant
- Can be installed over “green concrete” for early construction phase applications
- Can be feather-edged to meet existing elevations
- High performance, calcium aluminate formulation

**DIRECTIONS FOR USE**

Read and understand technical and safety data sheets completely before beginning installation. Refer to www.bostik-us.com for the most recent product information and safety data sheet prior to installation.

**SURFACE PREPARATION**

GENERAL NOTE: SL-150™ is not a vapor barrier. Test substrate as per ASTM F-1869 for (MVER) and/or ASTM F-2170 for (RH%). If levels exceed those permissible by any component in the flooring system, apply a Bostik moisture vapor barrier coating (i.e. Bostik Slab-Cote™, D-250™ or D-261™).

**TYPICAL PHYSICAL PROPERTIES**

</table>

Note: Depth of lift, cooler temperatures, inadequate ventilation and higher humidity can extend drying times.
All surfaces must be clean, sound, dry, 50° F (10° C) and free of oil, gypsum compounds, wax, grease, sealers and/or curing compounds, urethane, paint, asphalt, loose surface material or any contaminate that will act as a bond breaker. Never use acid or mastic removers on any surface to which a Bostik product will be applied. Substrate must have a minimum direct tensile bond test reading of 74 psi per (ASTM C-1583-04). If sealers and/or curing compounds are present they must be removed by mechanical means prior to application.

**CONCRETE** (TEXTURED, OPEN AND POROUS):

Preparation: Weak or contaminated surfaces must be cleaned down to solid, sound concrete by mechanical means such as shot–blasting, grinding or scarifying.

Priming: Apply one coat of Universal Primer™ Pro diluted 50/50 (1 part water: 1 part Universal Primer™ Pro) using a split tip broom. Pour out or spray liberally and work into surface, leave no puddles or bare spots. Apply SL-150™ once Universal Primer™ Pro is dry (minimum 1 hour) and up to 24 hours. If primer has dried longer than 24 hours a second coat of Universal Primer™ Pro will be required.

Thickness: 1/8” over the highest point. 1/4” up to 1” neat.

**NON-POROUS** (BURNISHED CONCRETE, TERRAZZO, CERAMIC AND QUARRY TILE):

Preparation: Mechanically abrade substrate to a dull finish with the use of a 60 grit or larger sandpaper, shot–blasting or grinding, vacuum or mop to remove dust.

Priming: Apply one thin coat of Universal Primer™ Pro (Undiluted) using a 3/8” nap roller. Apply SL-150™ once Universal Primer™ Pro is dry (minimum 2 hours) and up to 24 hours. If Universal Primer™ Pro has died longer than 24 hours a second coat of Universal Primer™ Pro will be required.

Thickness: 1/8” over the highest point. 1/4” up to 1” neat, and up to 1” per layer of Bostimatt™.

**EPOXY MOISTURE VAPOR COATING** (Bostik’s Slab-Cote™, D-250™ or D-261™)

Preparation: Sweep, vacuum, and wet mop to remove dust. DO NOT sand or abrade epoxy coating as this can compromise the performance of the coating.

Priming: Apply one thin coat of Universal Primer™ Pro (undiluted) using a 3/8” nap roller. Apply SL-150™ once Universal Primer™ Pro is dry (minimum 2 hours) and up to 24 hours. If Universal Primer™ Pro has died longer than 24 hours a second coat of Universal Primer™ Pro will be required.

Thickness: 1/8” over the highest point. 1/4” up to 1” neat.

**WOOD** (REQUIRES BOSTIMAT™ OR LATHE INSTALLATION)

NOTE: Wood must be a minimum 3/4”, untreated, APA Rated, Type-1, exterior grade plywood. The subfloor must be free of deflection (maximum L/360), considering both live and dead loads. Use an approved anti-fracture membrane over SL-150™ where ceramic tile or stone are being installed.

Preparation: Prepare by sanding down to clean bare wood. Secure wood subfloor with deck screws and fill open seams with UltraFinish™ Pro, Webcrete® 98 and Webcrete® 95. Replace any weak or water damaged wood.

Priming: Apply one thin coat of SL-150™ (Undiluted) using a 3/8” nap roller. Apply BostiMat™ and SL-150™ once Universal Primer™ Pro is dry (Minimum 2 hours) and up to 24 hours. If Universal

<td></td>
</tr>
<tr>
<td>Flexural Strength</td>
<td>1 day: 4,000 psi, 31.0 MPa</td>
</tr>
<tr>
<td>(ASTM C348)</td>
<td>28 days: 5,500 psi, 37.9 MPa</td>
</tr>
</tbody>
</table>

**REQUIRED APPLICATION TOOLS**

- Split-tip broom / 3/8” nap roller
- 1/2” drill (minimum 650 rpm)
- Measuring pail
- Split-tip broom / 3/8” nap roller
- 1/2” drill (minimum 650 rpm)

**ADHESIVE RESIDUE** (THIN, TRANSLUCENT, NON-WATER SOLUBLE, FREE OF TACK AND WELL BONDED)

Preparation: SL-150™ can be installed over thin (translucent) sound, non–water soluble adhesive residues that are free of tack and well bonded to the substrate. The adhesive cutback needs to be prepared using the wet scrape method as outlined in the Resilient Floor Covering Institute booklet “Recommended Work Practices for the Removal of Resilient Floor Coverings”. Remove all patching materials below the adhesive and avoid applications where heat or excessive moisture will soften or degrade the adhesive.

NOTE: If unsure of the suitability, deflection or heavy loads are expected, use application listed below for very distressed subfloors.

Priming: Apply one thin coat of Universal Primer™ Pro (Undiluted) using a 3/8” nap roller. Apply SL-150™ once Universal Primer™ Pro is dry (minimum 2 hours and up to 24 hours). If Universal Primer™ Pro has died longer than 24 hours a second coat of Universal Primer™ Pro will be required.

Thickness: 1/8” over the highest point. 1/4” up to 1” neat.

**VERY DISTRESSED SUBFLOORS** (REQUIRES BOSTIMAT™ INSTALLATION): MUD BEDS, LIGHTWEIGHT CONCRETE, OVERWATERED CONCRETE.

Preparation: Remove all loose debris from subfloor. Sweep and vacuum substrate thoroughly.

Priming: Apply one coat of Universal Primer™ Pro diluted 50/50 (1 part water: 1 part Universal Primer™ Pro) using a split tip broom. Pour out and work into surface, leave no puddles or bare spots. Apply BostiMat™ and SL-150™ once Universal Primer™ Pro is dry (minimum 2 hours and up to 24 hours). If primer has died longer than 24 hours a second coat of Universal Primer™ Pro will be required.

Thickness: 1/8” over the highest point. 1/4” up to 1” neat.

**MIXING**

Mix 2-bag batches of SL-150™. For each bag add a maximum 5.5 quarts of clean cold water into a mixing barrel. Then, add bags of SL-150™ while mixing at full speed with a mixing paddle attached to a heavy duty 1/2” drill (min. 650 rpm). Mix for 2 minutes or until lump free. Add no additional water and keep the mixing paddle immersed in the material to avoid entraining excess air.
4. On new concrete always test for sealers and/or curing compounds which inhibit bond. If sealers and/or curing compounds are present they must be removed by mechanical means prior to applying SL-150™.

5. Do not use over materials containing asbestos.

6. Cooler temperatures, inadequate ventilation and higher humidity can extend drying times.

7. It is the responsibility of the contractor to determine the suitability of this product for the desired application.

8. SL-150™ is for interior use only.

CLEAN UP
Clean tools with water immediately after use or by mechanical means once dry.

PACKAGING
50 lb. bags: 48 per pallet

COLOR
Gray

ELIGIBLE LEED CREDITS
3 total points:
Recycled Content (MR 4.1 & 4.2), 2 points
Low Emitting Materials (EQ 4.1), 1 Point

DANGER
POISON. HARMFUL IF SWALLOWED. CORROSIVE. CAUSES BURNS. MAY PRODUCE ALLERGIC REACTION BY SKIN CONTACT. CANCERAGENT! EXPOSURE MAY PRODUCE CANCER. CONTENTS HARMFUL. CAUSES BURNS. Do not swallow. Do not get in eyes. Do not get on skin or clothing. Keep out of reach of children. Handle with care. Wear a mask, rubber gloves, safety glasses.

FIRST AID TREATMENT
Contains quartz, Portland cement and vinyl acetate. If swallowed, call a Poison Control Center or doctor immediately. Do not induce vomiting. If in eyes, rinse well with water for 20 minutes. If on skin, rinse well with water. If on clothes, remove clothes.

SEE SAFETY DATA SHEET.

STORAGE AND SHELF LIFE
Store in cool, dry area (70° F / 21° C) off the ground on a pallet. Tightly seal package and do not expose to sun. Shelf life is 12 months from date of manufacturing in unopened bags.
