Surface Preparation Flooring Solutions

SELF-LEVELING UNDERLAYMENTS, PATCHES, SEALANTS, AND MOISTURE VAPOR BARRIER COATINGS

SL-Rapid™

RAPID SETTING SELF-LEVELING UNDERLAYMENT

SL-Rapid™ is a rapid-setting, cement-based, self-leveling and self-smoothing underlayment that can be used to create a smooth, flat or level surface prior to the installation of floor coverings. Its rapid-setting properties, low shrinkage and superior leveling properties make it the ideal product for time sensitive applications on, above, or below grade.

The SL-Rapid™'s setting properties mean that thin-set ceramic tile can be installed as quickly as one hour after walkable. Additionally, moisture sensitive floor coverings such as wood, carpet, VCT, vinyl sheet goods, and rubber can generally be installed 4 hours after walkable.

SELF DRYING™

INSTALL FLOOR COVERING IN 1 TO 4 HOURS

INSTALL FROM 1/8" TO 1" NEAT

UP TO 40% MORE FLUID THAN TRADITIONAL SELF-LEVELERS

SL-200™

ULTRA FLUID SELF-SMOOTHING UNDERLAYMENT

SL-200™ is an ultra fluid, self-smoothing underlayment used in preparation of finished floor coverings. SL-200™ can be installed at 1/8" using a gauge rake and smoothing tool. The ultra fluid, single lift application increases production over multi-coat patching methods and leaves a smoother surface. SL-200™ can also be installed as a self-leveling underlayment up to 1" when a flat or level subfloor is desired. This breakthrough formulation can be easily installed by one person, working alone, due to its long open time and superior flow rate.

SL-175™

PREMIUM SELF-LEVELING UNDERLAYMENT & WEAR LAYER

SL-175™ is a premium, cement-based, self-leveling underlayment that can be used to create a smooth, flat or level surface prior to the installation of floor coverings. Its long working time, low shrinkage and superior leveling properties make it the ideal product for demanding applications on, above or below grade.

SL-175™ is also a durable wear layer. When a natural concrete look is desired, topical stains, dyes and surface treatments further expand the decorative possibilities.

HYBRID GYPSUM-BASED SELF-LEVELING UNDERLAYMENT

SL-Gyp™ is a premium, hybrid gypsum / cement-based, self-leveling underlayment that can be installed from 1/4" up to 2" thickness without extension. It is designed for use over distressed gypsum subfloors, light weight concrete, mud beds, structurally sound wood, adhesive residue and it is ideal for use on radiant or in-floor heating systems.

SL-Gyp™ can also be used for certain low-prep applications where shot-blasting and mechanically cleaning substrates cannot be done.

Primers

TOTALPrime™

MULTI-SURFACE BOND-ENHANCING PRIMER

Bostik's TOTALPrime™ is a ready-to-use, polymer-based primer designed for a variety of challenging substrates. TOTALPrime™ tenaciously bonds to non-porous substrates, like epoxy coatings and existing tiles. The bond-enhancing sand suspended in the formulation imparts superior mechanical adhesion. TOTALPrime™ provides a coarse textured surface ideal for enhancing the bond of mortars, self-leveling underlayment and patches, ensuring excellent adhesion even on challenging substrates (see TDS).

Universal Primer™ Pro

DEEP PENETRATING PRIMER

Universal Primer™ Pro is a premium, one component, interior acrylic primer designed for use with Bostik's line of underlayments and patches. Universal Primer™ Pro's deep penetrating formulation can be used on a wide variety of substrates including concrete, wood, well bonded VCT, epoxy, tile, gypsum underlayment, cutback and other adhesive residues not affected by water. Universal Primer™ Pro is rapid drying and will adhere to both porous and non-porous substrates.

Repair Patches

UltraFinish™ Pro

PREMIUM PORTLAND CEMENT REPAIR PATCH

UltraFinish™ Pro is a cement-based, rapid drying, trowelable repair patch and skimcoat that is used to smooth subfloors prior to the installation of finished floor coverings.

UltraFinish™ Pro allows for the installation of many floor coverings in as little as 15 minutes. It can be applied over properly prepared concrete, wood, cement-based terrazzo, VCT, ceramic, quarry tile, cutback and non-water soluble adhesive residue.

APPLIES FROM A SKIM COAT TO 1/2"

Webcrete® 98

PREMIUM, FAST-SETTING, POLYMER-MODIFIED, PORTLAND CEMENT PATCH

Bostik Webcrete® 98 is a premium, fast-setting, specially formulated, polymer-modified, Portland cement patch that is to be mixed with water only. Bostik Webcrete® 98 is designed for interior use on floors and walls. It can be used to skim-coat or featheredge up to 1/2" deep in one application. Floor covering can be installed after just one hour from application. When used as an embossing floor leveler, there is no need to mix Bostik Webcrete® 98 with a latex additive.

- EXCELLENT SKIM-COATING, PATCHING & LEVELING
- FEATHEREDGE FINISH
- HIGH STRENGTH EMBOSS LEVELER

Webcrete® 98

Webpatch® D-9001

FAST SETTING POLYMER-MODIFIED GYPSUM PATCH

Bostik Webpatch® D-9001 is a fast-setting, polymer-modified gypsum based material designed for interior installation and may be used to patch floors, walls, and other surfaces. Webpatch® D-9001 may be used to fill up to 1/2" deep over properly prepared concrete, masonry, cementitious backer board, and structurally sound exterior grade plywood (interior/dry use only). When used properly, this product provides a fast-setting surface that will not check, crack or break up.

- REPAIRS MINOR IMPERFECTIONS IN FLOORS
- HIGH STRENGTH AND CRACK RESISTANT
- APPLY UP TO 1/2" DEPTH IN ONE APPLICATION

Collomix Mixers

LEVMIX 65 MOBILE MIXER
X04 DRILL & PADDLE

The LevMix 65 mobile mixer and Xo4 drill make the blending of self-leveling underlayments fast, easy and accurate. The LevMix 65 has been engineered to combine and simplify the three installation steps of mixing, transporting and pouring into one mobile, mixing unit. The user will also save time by mixing up to three, 50lb bags at once.

The Xo4 drill is powerful and comes with a special mixing paddle designed specifically for self-levelers.

Both drills help to ensure your mixtures are lump and residue-free and properly mixed without excessive air entrainment.

EQUIPMENT

Moisture Vapor Barrier Coatings

Roll–Cote™

HIGH-PERFORMANCE MOISTURE-VAPOR-BARRIER COATING AND PRIMER

Bostik Roll-Cote™ High-Performance Moisture Vapor Barrier Coating and Primer is a water-based, one-component system formulated to reduce substrate moisture vapor emissions, prime floors prior to the application of underlayments, and block concrete alkalinity. Roll-Cote™ significantly improves return-to-service speed for flooring installation by combining multiple steps into one product. Roll-Cote™ is suitable for use in many environments, is compatible with an assortment of flooring types, and can be used on both concrete and wood substrates. No mixing is required, and its easy-to-apply formulation and fast dry time makes Roll-Cote™ dependable and user-friendly. Roll-Cote™ is durable and low-odor, and the black color provides great visual indication of coverage during the installation process. Note: See the technical data sheet for compatible adhesives.

Read and understand technical and safety data sheets prior to installation. *See Roll-Cote™ technical data sheet for more information. [1]Moisture content of wood cannot exceed 15% per NWFA guidelines. [2]See flooring types on technical data sheet. [3]SLU or floor patch may be required for compatibility with resilient adhesives and to prevent telegraphing of substrate and surface imperfections. Contact Technical Service for more information.

Moisture Vapor Barrier Coatings

MVP4®

**MOISTURE VAPOR PROTECTION,
ANTI-FRACTURE AND NOISE REDUCTION MEMBRANE**

Bostik MVP4® Moisture Vapor Protection is a one-part, trowel applied, elastomeric, moisture cure urethane membrane designed to be used beneath glue-down installations of engineered, solid and bamboo hardwood flooring with Bostik's Best®, BST™, EFA+™, or Vapor-Lock™ adhesives. Bostik MVP4® is designed to reduce moisture vapor transmission from the subfloor, create a noise reduction barrier over the substrate, and establish an anti-fracture membrane, which can bridge cracks that can occur in the substrate prior to or after installation (up to 1/8").

PREVENTS DAMAGE CAUSED BY SUBFLOOR MOISTURE

BELOW, ON AND ABOVE GRADE INSTALLATIONS

EXCEEDS IRC REQUIREMENTS FOR VAPOR RETARDERS

Slab-Cote™

EXTREME MOISTURE VAPOR BARRIER COATING

Bostik Slab-Cote™ Extreme Moisture Vapor Barrier Coating is a single coat, two-component, 100% solids, epoxy formulated to dramatically reduce moisture vapor transmission and surface alkalinity from substrates. Slab-Cote™ passes ASTM F 3010-13, moisture mitigation system for use under resilient flooring. It has 0 VOC's (as calculated per SCAQMD Rule 1168), low odor and is solvent-free. Slab-Cote's™ unique formulation displays a gel-like end of pot life indicator. Material left to cure in the pail will get hot, but will not smoke excessively.

SINGLE COAT, RAPID CURE, 100% SOLIDS EPOXY FORMULATION

FOR USE ON PROPERLY PREPARED CONCRETE - EVEN GREEN

DRAMATICALLY REDUCES MOISTURE VAPOR TRANSMISSION & PH LEVELS FROM SUBSTRATES

Ultra-Set® SingleStep2™

ADVANCED TRI-LINKING™ ADHESIVE, MOISTURE CONTROL & SOUND REDUCTION MEMBRANE

Ultra-Set® SingleStep2™ is a high performance adhesive, moisture control, and sound reduction membrane all in one. Bostik's breakthrough AXIOS® Tri-Linking™ Polymer Technology used in this formulation maintains the superior long term durability, moisture control and sound abatement properties of high end urethane adhesives. However, it is easier to spread and clean off of prefinished flooring before and after cure. This adhesive contains 1% recycled rubber material, has zero VOC's (as calculated per SCAQMD Rule 1168) and does NOT contain any water.

Bostik unveils an innovative **new technology**

AXIOS™ Tri-Linking™ Polymer Technology is easy to spread, simple to clean and offers you the most protection for your hardwood flooring installations. Exactly what you would expect from the hardwood adhesive technology leader.

DESCRIPTION

Easy to clean and tough, Bostik's AXIOS™ Tri-Linking™ Polymer Technology is a breakthrough in adhesion science.

AXIOS™ technology combines the tenacious bond strength of Bostik's high performance urethane chemistry with the remarkable ease of use experienced from today's most advanced European, hybrid polymer systems.

With moisture vapor protection equivalent to premium moisture mitigation coatings, it's the go-to polymer chemistry for the ultimate in installation protection and simplicity. When combined with Bostik's patent-pending Thickness Control™ Spacer Technology, its performance is equivalent to the sound dampening properties of cork.

AXIOS™ is formulated for use in a variety of residential and commercial hardwood flooring installations, making them easier to install and more durable.

THE SCIENCE BEHIND THE TECHNOLOGY

Most hardwood adhesives today contain linear polymer chains that link to other molecules only at each end. AXIOS™ Tri-Linking™ Polymer Technology uses a revolutionary molecule that has three branches similar to a tripod. This allows each molecule to bond in three locations instead of only two, making the adhesive bond stronger.

Tri-Linking™ polymers are also more "entangled" because of their unique shape (think of how tangled a bowl full of miniature tripods would be). This entanglement creates a tightly interwoven layer that significantly inhibits water molecules from passing through, dramatically improving moisture vapor protection, sound reduction, and strength.

Reduce Risk, Improve Installations

Focus on Bostik's Thickness Control™ Spacer Technology

Thickness Control™ Spacers

At Bostik, innovation comes in many forms, not just chemistry. Bostik's patent-pending Thickness Control™ Spacer Technology is a proprietary feature that helps ensure proper membrane thickness is maintained between the hardwood flooring and substrate. Installers can use mallets to engage the tongue and groove or even walk on their work during the installation process without significant reduction in the film thickness that could compromise moisture protection or sound control.

The key is in the rubber crumbs mixed in with the adhesive. The particles are made of recycled, ground up car tires. The size of the particles creates the optimal membrane thickness for superior performance as a moisture reduction and sound control membrane. If you stand on a board installed over any adhesive using Thickness Control™ Spacers, the rubber particles prevent the fluid adhesive from squeezing out underneath the boards and the desired membrane thickness is maintained.

Bostik's Thickness Control™ Spacer Technology not only reduces your risk of failing to achieve proper membrane thickness that could result in flooring failures from moisture, it also makes installation easier. You won't need a special trowel or a clip-on component that wears out quickly. You can use common trowels and be confident that you've got the moisture control and sound reduction performance you expect.

Experiencing moisture issues?

We're here to help.

The hardwood industry's most trusted line of moisture vapor control products.

Bostik, the leader in hardwood adhesives, offers the most comprehensive range of products featuring unlimited moisture vapor protection with **no concrete moisture testing requirements**. Also, with these Bostik adhesives there are never any board width or length restrictions, making it easier for you to install your hardwood flooring. The formulas you trust and the performance you can rely on.

Vapor-Lock™

HARDWOOD ADHESIVE, MOISTURE CONTROL & SOUND REDUCTION MEMBRANE

Bostik's Vapor-Lock™ is a high performance adhesive, moisture control, and sound reduction membrane all in one. Its superior properties provide a tough, flexible, tenacious bond to a variety of surfaces, and it is not adversely affected by exposure to moisture, water or alkalinity. When applied as directed as a moisture vapor membrane, it will prevent damages caused by high subfloor moisture vapor. As a result, costly and time consuming concrete moisture testing is not required for solid or engineered hardwood flooring. For bamboo flooring, Vapor-Lock™ may be used for concrete slabs with elevated moisture levels up to 15 lbs or 87% RH.

Vapor-Lock™ exhibits exceptional green grab or high tack immediately after troweling, making installation easier and more secure. This adhesive contains 1% recycled rubber material, has zero VOC's (as calculated per SCAQMD Rule 1168) and does NOT contain any water. Vapor-Lock™ contains Bostik's BLOCKADE™ antimicrobial protection, which inhibits the growth of bacteria, mold, or mildew on the surface of the dried adhesive.

Bostik's BEST®

WOOD FLOORING URETHANE ADHESIVE AND MOISTURE VAPOR CONTROL

Bostik's BEST® is a high performance adhesive and moisture control membrane. Its superior properties provide a tough, flexible, tenacious bond to a variety of surfaces. Bostik's BEST® high tacking formula exhibits exceptional green grab immediately after troweling, making installation easier and more secure. When applied as directed as a moisture vapor membrane, it will prevent damages caused by high subfloor moisture vapor. As a result, costly and time consuming concrete moisture testing is not required for engineered hardwood flooring. For solid hardwood or bamboo on substrates >3 lbs. or 75% RH, use MVP4® prior to the use of Bostik's BEST®.

This adhesive has low VOC's (measured per EPA Method 24) and does NOT contain any water. Bostik's BEST® contains Bostik's BLOCKADE™ antimicrobial protection, which inhibits the growth of bacteria, mold, or mildew on the surface of the dried adhesive.

Sound Reduction
With Adhesive!

Nobody wants to be disturbed by their neighbors. Whether it's the home theater system from your neighbors below, or the high heeled shoes of the neighbor above, acoustics play an essential role in the comfort of a home. Bostik offers several products specifically designed to improve acoustics.

Bostik installation systems with Sound Guard™ eliminate the need for mats or underlayments used beneath hardwood floor, resulting in faster in faster installs times and lower project costs. These adhesives reduce the vibration of boards, resulting in a quieter, more comfortable floor.

EFA+™

ELASTOMERIC FLOORING ADHESIVE & MOISTURE VAPOR RETARDER

Bostik's EFA+™ is an easy-to-trowel urethane adhesive and moisture control membrane. It provides a tough, flexible, tenacious bond to a variety of surfaces. Bostik's EFA+™ elastomeric characteristics allow the adhesive to move with the wood as it expands and contracts over the life of the floor. Bostik's EFA+™ exhibits a long open time, making installation easier and faster. This adhesive has low VOC's (as calculated per SCAQMD Rule 1168) and does NOT contain any water.

- EASY SPREAD
- GREAT RIDGE RETENTION
- LOW VOC

BST™

WOOD FLOORING ADHESIVE & MOISTURE VAPOR RETARDER

Bostik's BST™ is a urethane adhesive and moisture control membrane. Its superior properties provide a tough, flexible, tenacious bond to a variety of surfaces. Bostik's BST™ elastomeric characteristics allow the adhesive to move with the wood as it expands and contracts over the life of the floor. Bostik's BST™ exhibits exceptional green grab making installation easier as it minimizes slipping of the flooring. This adhesive has low VOC's (as calculated per SCAQMD Rule 1168) and does NOT contain any water.

- GREAT GREEN GRAB MINIMIZES SLIPPING
- MODERATE MOISTURE VAPOR PROTECTION
- LOW VOC

Pro-MSP™

HARDWOOD ADHESIVE WITH MOISTURE VAPOR PROTECTION

Bostik's Pro-MSP™ is a hardwood and bamboo adhesive and moisture control membrane all in one. This adhesive formulation maintains long term durability and moisture control properties, and it is easy to spread and clean off of prefinished flooring before and after cure. This adhesive has low VOC's (as measured per EPA Method 24) and does NOT contain any water.

- EASY SPREAD & CLEAN
- SUBFLOOR MOISTURE PROTECTION
- LOW ODOR & VOC

Pro-Cure™

MOISTURE-CURE URETHANE ADHESIVE

Bostik's Pro-Cure™ is a professional grade, moisture-cure urethane adhesive for wood flooring; this adhesive does NOT contain any water. Pro-Cure™ may be used to adhere all engineered, acrylic impregnated, solid plank-flat milled, shorts, bamboo and parquet hardwood flooring designed and recommended in writing by the hardwood flooring manufacturer for glue-down applications. This adhesive can also be used to install plywood as described, as well as, ceramic tile, marble, and stone inlays for light commercial and/or residential applications.

- GREAT GREEN GRAB MINIMIZES SLIPPING
- MODERATE MOISTURE VAPOR PROTECTION
- LOW VOC

Wood-Tack™

ENGINEERED WOOD FLOORING ADHESIVE

Bostik's Wood-Tack™ is an adhesive for engineered, solid, and select bamboo hardwood flooring installations. This air-curing, self-crosslinking adhesive is exceptionally easy to trowel, and its rapid tacking properties allow for fast installation of wood flooring materials. Wood-Tack™ is a low VOC, low odor adhesive that does not contain any solvents or heavy metals. This adhesive provides exceptional bond strength between the wood flooring and substrate.

- RAPID TACKING
- FAST INSTALLATION IN ABOVE-GRADE APPLICATIONS
- EXCEPTIONALLY EASY TO TROWEL

Climb™

HARDWOOD WALL PLANK AND TREAD CAP ADHESIVE

Bostik's Climb™ is a one-component, easy gunning, non-sag adhesive that is specifically formulated for hardwood flooring planks or blocks on interior, above-grade walls and installation of stair tread caps. The Climb™ formula has superior green grab (grab strength while wet) and cures quickly to form a tenacious bond. Once cured, Climb™ remains tough yet flexible for extreme durability, helps reduce stair squeaking, and reduces the sound of footsteps on the stairs. This specialty formulation is also easy to clean off of hardwood wall planks, prefinished tread caps and risers even after cure. Climb™ has 0% solvents and low odor.

- EXTREMELY STRONG, DURABLE BOND
- EASY TO CLEAN, EVEN AFTER CURE
- HELPS ELIMINATE SQUEAKING & REDUCES SOUND

LOW VOC

Heavy Duty™

CONSTRUCTION ADHESIVE

A one-component, moisture cure polyurethane adhesive exhibiting high strength and is suitable for both interior and exterior installations. Heavy Duty™ Construction Adhesive typically does not require priming to achieve a watertight seal on common construction materials such as stone, concrete, masonry, cedar, wood, anodized aluminum, galvanized steel, vinyl, fiber-cement board, etc. Heavy Duty™ Construction Adhesive can bond to wet, frozen or treated lumber.

- REDUCES SQUEAKS IN SUB-FLOORS
- 95% SOLIDS AND FASTER CURE THAN TYPICAL SOLVENT-BASED SYSTEMS
- ADHERES TO WET AND FROZEN LUMBER

FAST CURE   LOW VOC

PWC

GENERAL PURPOSE SILICONIZED ACRYLIC CAULK

Bostik's PWC is a siliconized acrylic latex caulk with excellent adhesion to most building materials and common household surfaces. PWC is compatible with latex and oil based paints. Bostik PWC has been developed for caulking applications including: trim, windows, door frames, sinks, tubs, shower surrounds, countertops, ceramic tile and natural stone.

- PAINTABLE IN 2-3 HOURS
- FLEXIBLE BOND AND LOW SHRINKAGE TO PREVENT CRACKING
- COMPLEMENTS MOST PRE-FINISHED WHITE TRIM

PAINTABLE   LOW VOC

Ultimate™

ADHESIVE REMOVER

Bostik's Ultimate™ Adhesive Remover is a readily biodegradable, low odor, water rinseable solution. Use Ultimate™ to remove wet and cured urethane adhesive from the surface of pre-finished (non-wax) wood flooring.

- READY TO USE
- REMOVES CURED AND UNCURED URETHANE ADHESIVES
- RESIDUE FREE

Cartridge Guns

CARTRIDGE DISPENSING GUNS

Bostik high quality cartridge guns are designed to last and to make your job easier. Our standard 7:1 and 12:1 drives are perfect for lower viscosity products, while our higher deluxe 18:1 and 26:1 drives are perfect for the higher viscosity hardwood adhesives and construction sealants.

- STANDARD 7:1 AND 12:1 DRIVES FOR LOWER VISCOSITY PRODUCTS
- DELUXE 18:1 AND 26:1 DRIVE FOR VERY VISCOUS PRODUCTS

ADHESIVES FOR LVT, LVP, SHEET VINYL, VCT, WPC, SPC, CARPET TILES & RUBBER FLOORING

LOCK A699 PSA™

HIGH-MOISTURE RESISTANT RESILIENT ADHESIVE

LOCK A699 PSA™ is a solvent-free, water-based, acrylic adhesive specifically formulated for the installation of most resilient flooring in residential and commercial applications and has high moisture resistance. LOCK A699 PSA™ is a 0-VOC formulation as calculated by SCAQMD Rule 1168. It displays tenacious early bond strength and is specially formulated to be highly resistant to plasticizer migration. LOCK A699 PSA™ has been formulated to exhibit a unique combination of application properties including excellent trowelability, fast tack/grab, low odor and easy clean up.

LOCK A699 PSA™ is formulated to resist moderate amounts of moisture vapor from concrete substrates, allowing it to bond flooring in conditions up to 99% RH, and pH of up to 11.0. Always measure the in-situ RH of concrete slabs in accordance with ASTM F 2170 and test the pH of the slab.

LOCK A490 LVT™

FIRM-SET VINYL FLOORING ADHESIVE

LOCK A490 LVT™ is a solvent-free, water-based, acrylic adhesive specifically formulated for the installation of vinyl flooring in high rolling load applications. LOCK A490 LVT™ is a 0-VOC formulation as calculated by SCAQMD Rule 1168. It displays tenacious early bond strength, and is specially formulated to be highly resistant to plasticizer migration. LOCK A490 LVT™has been formulated to exhibit a unique combination of application properties including excellent trowelability, fast tack/grab, low odor and easy clean up. LOCK A490 LVT™ may be used to adhere LVT (Luxury Vinyl Tile), LVP (Luxury Vinyl Plank), and sheet vinyl. It may be used over all properly prepared substrates common to resilient flooring installations including; concrete, APA grade plywood, cementitious-based patch/underlayments, gypsum-based patch/underlayments (in dry, above-grade applications), terrazzo, and radiant heated flooring.

- RAPID TACKING, FIRM SET
- HIGH BOND & SHEAR STRENGTH
- PLASTICIZER MIGRATION RESISTANT

LOCK A499 PSA™

UNIVERSAL PRESSURE SENSITIVE ADHESIVE

LOCK A499 PSA™ is a multi-purpose, high tack, water-based adhesive specifically formulated for the installation of most resilient flooring in residential and commercial applications. LOCK A499 PSA™ is a low VOC formulation. LOCK A499 PSA™ flashes off quickly, but has a long working time. It displays tenacious bond strength. LOCK A499 PSA™ has been formulated with exceptional application properties including excellent trowelability, fast tack/grab, low odor, and easy clean up.

- PERMANENT, AGGRESSIVE TACK
- BONDS A WIDE VARIETY OF FLOORING
- BONDS UP TO 99% RH & 12.0 PH

LOCK A799 TRANSITIONAL™

UNIVERSAL FIRM SET TRANSITIONAL ADHESIVE

LOCK A799 TRANSITIONAL™ is a multi-purpose, high tack, water-based acrylic adhesive that installs like a pressure sensitive adhesive but transitions to a firm set after 72 hours. It is specifically formulated for the installation of most resilient flooring in residential and commercial applications and is a 0 VOC formulation as calculated per SCAQMD Rule 1168. When used with carpet tiles, this adhesive is formulated for releasing and re-bonding while permanently retaining its tack, allowing individual tiles to be lifted out and replaced without substantial loss of adhesive properties. LOCK A799 TRANSITIONAL™ has been formulated with exceptional application properties including excellent trowelability, fast tack/grab, low odor, and easy clean up.

- AGGRESSIVE TACK
- BONDS A WIDE VARIETY OF FLOORING
- BONDS UP TO 99% RH & 12.0 PH (FOR SHEET VINYL, 90% RH & 10.0 PH, PVC CARPET TILE, 95% RH & 10.0 PH)

LOCK A195 VCT™

MOISTURE RESISTANT VINYL COMPOSITION TILE ADHESIVE

LOCK A195 VCT™ is a solvent-free adhesive that dries translucent. Tiles may be laid into the adhesive for an extended period of time after drying. Aggressive tack permits installers to work off tiles. This low-odor adhesive can be used in occupied environments such as hospitals, schools, nursing homes, hospitality, and food preparation centers. LOCK A195 VCT™ is highly water resistant when dry. LOCK A195 VCT™ contains an advanced antimicrobial system to protect the adhesive from bacteria and fungal growth. LOCK A195 VCT™ has an extended working time provided it remains free of dust and dirt.

- APPROVED FOR USE OVER 'CUTBACK' STAINS
- SOLVENT-FREE
- EXTENDED WORKING TIME

LOCK P799 I/O RUBBER™

PREMIUM RUBBER FLOORING ADHESIVE

LOCK P799 I/O RUBBER™ is a solvent-free, single-component, moisture-cured, urethane adhesive specifically formulated for the installation of most rubber flooring. LOCK P799 I/O RUBBER™ is a 0-VOC formulation (as calculated per SCAQMD Rule 1168). Once cured, this adhesive is not adversely affected by exposure to moisture and its superior properties provide a tenacious bond to a variety of surfaces either indoors or outdoors. LOCK P799 I/O RUBBER™ has been formulated to exhibit a unique combination of application properties including excellent trowelability, fast tack/grab, low odor and easy clean up.

- SUPERIOR BOND STRENGTH
- INTERIOR & EXTERIOR
- LOW ODOR & SOLVENT FREE

LOCK A485 MP™

MULTI-PURPOSE CARPET ADHESIVE

LOCK 485 MP™ premium multi-purpose adhesive is designed for direct glue-down interior carpet installations, for bonding carpet to pad in double stick systems and can also be used with mineral or fibrous-backed resilient sheet goods. LOCK 485 MP™ quickly develops adhesive legging and forms a strong durable bond with most commercial broadloom carpets. The adhesive remains tacky for an extended period of time, has little odor and is environmentally friendly. LOCK 485 MP™ contains an antimicrobial system for enhanced resistance to mold and mildew.

- COMMERCIAL AND RESIDENTIAL USE
- SOLVENT-FREE
- FAST TACKING / QUICK LEGGING

LOCK A100 COVE™

COVE BASE AND WALL ADHESIVE

Bostik LOCK A100 COVE™ is a solvent-free, water-based, acrylic adhesive specifically formulated for the installation of vinyl (PVC) and rubber cove base, as well as vinyl wall coverings. LOCK A100 COVE™ contains low VOCs. It displays tenacious wet strength and is specially formulated to be highly resistant to plasticizer migration. LOCK A100 COVE™ has been formulated to exhibit a unique combination of application properties including excellent trowelability, fast tack/grab, low odor, and easy cleanup.

- HIGH STRENGTH FORMULATION
- EASY SPREAD & WORKABILITY
- PLASTICIZER MIGRATION RESISTANT

LOCK A285 MP™

CONTRACTOR GRADE MULTI-PURPOSE ADHESIVE

LOCK A285 MP™ is an economical contractor-grade multipurpose adhesive ideal for light traffic installations in offices, residential, and light commercial areas. LOCK A285 MP™ is a solvent-free, waterbased adhesive suggested for use in occupied buildings, as it is low in odor, contains no solvents and is environmentally safe with no hazardous ingredients. LOCK A285 MP™ contains an Antimicrobial System for enhanced resistance to mold and mildew.

- ECONOMICAL FORMULA
- SOLVENT-FREE
- STRONG BOND STRENGTH

LOCK A495 AERO™

SOLVENT-FREE AEROSOL RESILIENT ADHESIVE

LOCK A495 AERO™ is a solvent-free, water-based, acrylic spray adhesive with high moisture resistance, specifically formulated for the installation of sheet vinyl, LVT, and VCT. LOCK A495 AERO™ is a 0-VOC formulation (as calculated by SCAQMD Rule 1168). It displays tenacious early bond strength, and is specially formulated to be highly resistant to plasticizer migration. LOCK A495 AERO™ has been formulated for fast tack/grab, low odor and easy clean up. Extended working time provided it remains free of dust and dirt.

- RAPID TACKING
- FAST INSTALLATION IN ABOVE-GRADE APPLICATIONS
- EXCEPTIONALLY EASY TO TROWEL

COTE A985 ENCAPSULATOR™

ADHESIVE RESIDUE ENCAPSULATOR

COTE A985 ENCPSULATOR™ is a light-colored, high-strength acrylic polymer compound formulated to isolate old cutback stains and other adhesive residues that would discolor or affect the bond of the new flooring installation. Black asphalt-based cutback adhesive is highly reactive with vinyl back flooring and must be completely removed until there are no remaining trowel ridges or continuous film. COTE A985 ENCAPSULATOR™ can be used to isolate the remaining permanent stain after the cutback has been removed. Prior to the installation of floor covering systems, COTE A985 ENCAPSULATOR™ provides a clean surface for better adhesive bonds. It is solvent-free, low VOC, and contains an antimicrobial system for enhanced resistance to mold and mildew. COTE A985 ENCAPSULATOR™ is designed and warranted for use only in conjunction with adhesives manufactured by Bostik, Inc.

COTE A985 GYP™

PRIMER FOR ALKALINE OR POROUS SUBSTRATES

COTE A985 GYP™ is an acrylic floor preparation solution designed to improve flooring substrates before the application of floor covering adhesives. COTE A985 GYP™ will improve dry, porous substrates for a better bonding surface, help protect the adhesive from alkalinity damage and improve adhesive spread rate. COTE A985 GYP™ is suitable for use over APA approved flooring grade plywood, concrete or acoustical concrete and floor patch and can prevent over absorption of adhesives resulting in a better bond. COTE A985 GYP™ may also be used as a primer for gypsum-based substrates prepared in accordance with ASTM F2419. COTE A985 GYP™ is designed and warranted for use only in conjunction with adhesives manufactured by Bostik, Inc.

SUBSTRATE PREPARATION

- APPROVED FOR USE OVER 'CUTBACK' STAINS
- IMPROVES ADHESIVE BOND
- PROTECTS AGAINST PLASTICIZER MIGRATION

- PROMOTES A BETTER BONDING SURFACE
- BLOCKS SURFACE PH
- ROLL ON APPLICATION

BAM™

FIBER-REINFORCED, RAPIDCURE™, LARGE & HEAVY TILE MORTAR

Bostik BAM™ is a high performance, fiber-reinforced, extended open time, large and heavy tile mortar with RapidCure™ Technology. BAM™ is specifically formulated for maximum performance in commercial and residential applications of large and heavy tile, glass tile, mosaics, quarry, porcelain, ceramic, most natural stone tiles, and gauged porcelain tile / panels. The RapidCure™ Technology in BAM™ allows for a consistent cure that results in most applications to be ready for grout in 4 hours, while delivering an open time and adjustability time of up to 30 minutes at exceptional bond strength that exceeds ANSI 118.15 requirements. BAM's™ RapidCure™ Technology allows for use over uncoupling membranes and various sheet membranes. BAM™ is suitable for use over properly prepared concrete, cement backer boards, masonry, concrete block, mortar beds, cement terrazzo, structurally sound exterior grade plywood (interior / dry use only), existing, well-bonded vinyl composite tile (VCT), existing tiles, cutback adhesive residue (dry only), Bostik Ultra-Set® Advanced™, Black-Top™, and GoldPlus™.

Bosti-Set™

THIN PORCELAIN TILE PANEL ADHESIVE & SOUND REDUCTION MEMBRANE

Bosti-Set™ is a one-component, non-sag, easy to trowel adhesive that is specifically formulated for the installation of thin (gauged) porcelain tile panels on interior vertical surfaces or counter tops. Bostik's patent pending Tenirex™ Polymer Technology used in this product is a revolutionary, proprietary formulation found only in Bosti-Set™. Tenirex™ Polymer Technology provides the adhesive remarkable instant grab and holding power, enabling panels to be rapidly set on walls and repositioned for up to 30 minutes with no slip or sag. Bosti-Set™ requires only a single coat in application for faster and easier installation than a conventional mortar installation and holds thin porcelain tiles as large as 1/4" x 5' x 10' (6mm x 1.5m x 3m).

Big Tiles Require
BIG SOLUTIONS!

HIGH-PERFORMANCE MORTARS

Tile formats continue to expand in size, and Bostik's large and heavy tile mortars are set to fulfill your needs with this trend. Whether it's a multi-purpose large and heavy tile mortar, or the highest performing anti-sag mortar, our solutions will offer the support your project requires.

Large and heavy tiles (defined as having at least one side greater than 15" long, including plank format tiles, or tiles weighing more than 5 pounds per square foot) will often require a larger trowel size, along with a

large & heavy tile mortar to achieve the mortar coverage requirements of our industry. These large and heavy tile mortars will resist slumping on floors, sagging on walls, and hold a ridge better than traditional thin-set mortar.

The use of surface preparation products to flatten floors and walls before the application of large & heavy tile mortars will result in a more expeditious and consistent application of mortar and tile.

For more information about large & heavy tile mortars, scan this code, or visit:
bostik.com/us

Glass-Mate™

GLASS TILE MORTAR

Bostik Glass-Mate™ is a premium, polymer-modified, thinset mortar that exhibits superior bond strength, durability, non-sag properties and workability. Its bright white color and high polymer content make it ideal for setting individual glass tiles, sheet mounted glass tile, and most types of tile or natural stone in thinset applications over cement-based or masonry substrates.

Reflex®

ULTRA-PREMIUM POLYMER-MODIFIED MORTAR

Bostik Reflex® Ultra-Premium Polymer-Modified Mortar is for interior or exterior installations to set all types of porcelain, saltillo, ceramic, glass, granite, slate, marble, limestone, thin porcelain tiles, large porcelain panels and dimensional stone tiles. Reflex® has excellent mixing and application properties. Use over properly prepared concrete; structurally-sound, exterior grade plywood (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™, Bostik Black-Top™, Bostik GoldPlus™; existing, well-bonded vinyl/VCT or ceramic tile and cutback adhesive residue (dry only).

StoneWall™

HIGH PERFORMANCE AND NON-SAG MORTAR

Bostik StoneWall™ is for interior or exterior, commercial or residential installations to set all types of porcelain, saltillo, ceramic, granite, slate, marble, limestone and dimensional stone tiles. StoneWall™ is formulated to prevent large bodied ceramic, porcelain and stone tiles from slipping in vertical applications. Bostik StoneWall™ is also suitable for installing floor tiles. Use over properly prepared concrete; structurally sound, exterior grade plywood (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™; Bostik BlackTop™; Bostik GoldPlus™; existing, well-bonded vinyl composition tile (VCT) or ceramic tile; and cutback adhesive residue (dry only).

Big Tile & Stone™

POLYMER-MODIFIED LARGE AND HEAVY TILE MORTAR

Bostik Big Tile & Stone™ is a polymer-modified, large & heavy tile mortar used for interior or exterior installations to set all large sized ceramic, porcelain, granite, slate, marble, limestone, thin porcelain tiles, large porcelain panels and dimensional stone tiles. Bostik Big Tile & Stone™ may also be used for vertical applications. Use over structurally-sound: properly prepared concrete, exterior grade plywood (interior/dry use only), cementitious backer board, Bostik Ultra-Set® Advanced™, Bostik Black-Top™, Bostik GoldPlus™ and existing, well-bonded vinyl composition tile (VCT) or ceramic tile. Big Tile & Stone™ may be used for uneven tile and stone thicknesses; or to minimize lippage. Big Tile & Stone™ white formulation is approved for non-sag applications for tiles up to 12" x 24".

Single-Flex® FS

FAST SETTING PREMIUM MULTI-PURPOSE POLYMER-MODIFIED THINSET MORTAR

Bostik Single-Flex® FS Fast Setting Premium Multi-Purpose Polymer-Modifed Thinset Mortar is for interior or exterior installations to set all types of ceramic, porcelain, granite, slate, marble, limestone, and dimensional stone tiles. Use over properly prepared concrete; structurally-sound, exterior grade plywood (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™, Bostik Black-Top™ and Bostik GoldPlus™; and existing, well-bonded vinyl composition tile (VCT) or ceramic tile.

Single-Flex®

PREMIUM MULTI-PURPOSE POLYMER-MODIFIED THINSET MORTAR

Bostik Single-Flex® Premium Multi-Purpose Polymer-Modified Thinset Mortar is for interior or exterior installations to set all types of ceramic, porcelain, granite, slate, marble, limestone and dimensional stone. Use over properly prepared concrete; structurally-sound, exterior grade plywood (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™, Bostik Black-Top™ and Bostik GoldPlus™; and existing, well-bonded vinyl composition tile (VCT) or ceramic tile.

Large Format Floor™

POLYMER-MODIFIED MORTAR FOR LARGE FORMAT CERAMIC FLOOR TILES

Bostik Large Format Floor™ is a polymer-modified mortar designed for floor installations of natural stone, granite, slate, marble, porcelain tiles and large format ceramic tiles. Use over properly prepared, structurally sound-concrete, exterior grade plywood (interior/dry use only); cementitious backer board and existing ceramic tile.

Bostik PM™

MULTI-PURPOSE POLYMER-MODIFIED THINSET MORTAR

Bostik PM™ Multi-Purpose Polymer-Modified Thinset Mortar is for interior or exterior installations to set all types of ceramic, porcelain, granite, slate, marble, limestone, and dimensional stone tiles. Use over properly prepared concrete; structurally-sound, exterior grade plywood (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™, Bostik Black-Top™ and Bostik GoldPlus™; and existing, well-bonded vinyl composition tile (VCT) or ceramic tile.

Porcelain-Mate™

POLYMER-MODIFIED PORTLAND CEMENT THINSET MORTAR

Bostik Porcelain-Mate™ is for interior or exterior* installations to set all types of ceramic, porcelain, granite, slate, marble, limestone and dimensional stone tiles. Use over properly prepared concrete, cement backer board, cured mortar beds, brick, cement block, and Bostik GoldPlus™.

* Mixed with 425™ admixture

Ditra-Set™

PORTLAND CEMENT AND LARGE AND HEAVY TILE MORTAR FOR SCHLUTER®-DITRA® SCHLUTER®-KERDI® AND UNCOUPLING AND WATERPROOFING MEMBRANES

Bostik Ditra-Set™ is composed of select, proprietary chemicals, carefully graded aggregates and purified cements. It provides outstanding workability, excellent durability, significant leveling characteristics and superior bond strengths in interior and exterior applications when used in conjunction with the Schluter®-DITRA® uncoupling membrane and Schluter®-KERDI® waterproofing membrane. Use Bostik Ditra-Set™ to install the membranes over substrates approved by Schluter®-Systems and to set ceramic, porcelain, and stone tile over Schluter®-DITRA® and Schluter®-KERDI®.

Tile-Mate® Premium

PREMIUM, UNMODIFIED THINSET MORTAR

Bostik Tile-Mate® Premium Thinset Mortar is composed of select, proprietary chemicals, carefully graded aggregates and Portland cement. Bostik Tile-Mate® Premium Thinset Mortar is pre-blended and ready to use. It provides superior bond strengths, excellent durability and outstanding workability. Bostik Tile-Mate® Premium Thinset Mortar is for interior or exterior applications to set all types of ceramic, porcelain, granite, slate, marble, limestone, and dimensional stone tiles. Use over properly prepared concrete; structurally sound, exterior grade plywood* (interior/dry use only); cementitious backer board; Bostik Ultra-Set® Advanced™*, Bostik Black-Top™*, Bostik GoldPlus™* and existing, well-bonded vinyl composition tile (VCT)* or ceramic tile*.

*When mixed with Bostik 425 Multi-Purpose Acrylic Latex Admixture.

Rapid Cure™ Product Line

FAST ACTING
Superior Performance

RapidCure™ from Bostik is an innovative technology that is formulated for superior, fast-acting performance in a select line of products for every stage of surfacing installation.

Contact your sales representative for more information on the product systems available within the RapidCure™ family. For additional features and for details on application guidelines, reference each product's technical data sheet.

1900™

EPOXY MODIFIED GROUT & MORTAR ADMIXTURE

Bostik 1900™ Epoxy Modified Grout and Mortar Admixture, when mixed with Bostik Hydroment® Ceramic Tile Grout™ (sanded only), is for interior and exterior installations to set and/or grout all ceramic, porcelain, quarry, granite, slate, marble, limestone and dimensional stone tiles. Exceeds ANSI A118.8.

3 DAY WATER EXPOSURE

Dimension® RapidCure™

www.youtube.com/BostikUSA

GLASS FILLED, PRE-MIXED, URETHANE GROUT

Dimension® RapidCure™ is a pre-mixed, water based, urethane grout offering the ultimate in color accuracy, water resistance and stain/crack protection. This grout contains Bostik's HXD™ Technology resin system, and is the world's first glass-based, pre-mixed grout.

Dimension® RapidCure™ is ideally suited for glass, metal, natural stone and even porcelain tile installations where the subtle sparkle of reflective light brings an elegant sophistication to the tile selection. It is a simple to install grout, designed to bring long lasting beauty and protection to grout joints with an easy installation experience. Simply stir, apply and clean as you go.

Dimension® RapidCure™ is approved for intermittent water exposure after only 3 days of cure. It can be used in horizontal (floor) grout joint widths from 1/16" to 1/2" and vertical (wall) grout joints from 1/16" to 1/4".

PREMIUM, PRE-MIXED, URETHANE GROUT

TruColor® RapidCure™ Premium, Pre-Mixed, Urethane Grout is a water-based grout offering the ultimate in color accuracy, water resistance, and stain and crack protection.

This grout also contains Bostik's HXD™ Technology resin system. HXD™ technology enables only Bostik to offer the highest performance resin system of any pre-mixed grout available. The resin system is the most important factor in grout performance. This breakthrough in polymer chemistry enables Bostik premium, pre-mixed grouts to offer unmatched toughness, water and stain resistance. It's no surprise that Bostik is the most specified pre-mixed grout in the architect and design community today.

Suitable applications include interior & exterior installations in dry to intermittent wet or submerged applications. It can be used in horizontal (floor) grout joint widths from 1/16" to 1/2" and vertical (wall) grout joints from 1/16" to 1/4".

*Tub & Tile Caulk™ Sanded is available in all 35 colors, Tub & Tile™ Caulk Unsanded is available in select colors.
Color samples are printed reproductions and should only be used as approximate guides to appearance. Actual shade and texture will depend on jobsite conditions, installation techniques, tile characteristics, lighting and other factors beyond Bostik's control. It is recommended to verify appearance with a test area before main installation commences.

GROUTS

EzPoxy™ EzClean™

100% SOLIDS EPOXY MORTAR & GROUT

EXCELLENT CLEANABILITY

SUPERIOR CHEMICAL RESISTANCE

MEETS ANSI A118.3 SPECIFICATION

Bostik EzPoxy™ EzClean™ is a 100% Solids Epoxy Mortar & Grout with outstanding application and clean-up properties. This easy-to-use epoxy offers uniform color, exceptional durability, stain and sag resistance and never needs to be sealed. It is ideal for use in commercial and residential kitchens, lobbies, bathrooms, fast food restaurants, factories, shopping malls, steam rooms, swimming pools and fountains.

As a mortar: EzPoxy™ EzClean™ is a suitable bonding mortar for interior applications only. Use to set all ceramic, quarry, porcelain, granite, slate, pre-cast Terrazzo, dimensional stone tiles, and moisture-sensitive stone.

As a grout: Use to grout all ceramic, quarry, porcelain, granite, slate, and pre-cast Terrazzo, dimensional stone tiles, for use in grout joints from 1/16" to 1/2" wide.

Hydroment® Vivid™

RAPID-CURING HIGH-PERFORMANCE GROUT

Hydroment® Vivid™ is a rapid-curing, premium grade, cement-based grout for demanding commercial and residential projects. Hydroment® Vivid™ offers consistent color technology with enhanced stain and efflorescence protection. It is both fiber reinforced and rapid curing, which offers early strength development for demanding, high performance installations. Hydroment® Vivid™ exceeds requirements of ANSI A118.7 and contains Bostik's Blockade® Antimicrobial Protection. For use in grout joints from 1/16" to 1/2" wide.

www.youtube.com/BostikUSA

HyDrix™ TECHNOLOGY

HyDrix™ Technology allows Bostik to precisely control the timing and formation of the chemical and physical matrix of Hydroment® Vivid™ grout during the curing process. This advancement in materials science creates a micro structurally dense internal matrix that offers you the most durable, easy to use, cement-based grout available. This water tight matrix results in a superior grout joint which resists the penetration of liquids and most staining agents EZPOXY™ EZCLEAN™ while also exhibiting best in class efflorescence resistance.t.

SUPERIOR COLOR CONSISTENCY

FIBER REINFORCED DURABILITY

EXCELLENT STAIN RESISTANCE

BLOCKADE™ Antimicrobial Protection

STAIN Resistant

CRACK Resistant

ZERO VOC

GROUTS

Hydroment® Dry Tile Grout™ UNSANDED

FOR USE IN GROUT JOINTS UP TO 1/8"

Bostik Hydroment® Dry Tile Grout™ (Unsanded) is formulated from select grades of ground quartz, Portland cement, colorfast pigments and other special proprietary ingredients. It provides superior strength and durability with a wide variety of tiles. Exceeds ANSI A118.6 when mixed with water and A118.7 when mixed with Bostik 425™ Multi-Purpose Acrylic Latex Admixture. For use in grout joints up to 1/8".

USE WITH MARBLE

USE IN SMALL JOINTS

EXCEEDS ANSI A118.6 AND A118.7 REQUIREMENTS

CONTAINS BOSTIK'S BLOCKADE™ ANTIMICROBIAL PROTECTION

INTERIOR AND EXTERIOR, FLOORS, WALLS AND CEILING INSTALLATIONS

Hydroment® Ceramic Tile Grout™ [SANDED]

FOR USE IN GROUT JOINTS FROM 1/8" TO 1-1/2"

Hydroment® Ceramic Tile Grout™ (Sanded) is a proven blend of carefully graded quartz aggregates, Portland cement, colorfast pigments and other special proprietary ingredients. It provides superior strength and durability with a wide variety of tiles. Hydroment® Ceramic Tile Grout™ is a polymer-modified grout that exceeds the requirements of ANSI A118.6 when mixed with water, and ANSI A118.7 mixed with Bostik 425™ Multi-Purpose Acrylic Latex Admixture. Meets ANSI A118.8 when mixed with Bostik 1900™ Modified Epoxy.

GROUTS

Grip N Grab™

ADVANCED HYBRID POLYMER GRAB ADHESIVE

Bostik's Grip N Grab™ is an instant grab adhesive, based on advanced hybrid polymer technology, specifically designed to decrease installation time of vertical applications. Grip N Grab™ high initial bond strength provides the ability to grab heavy materials quickly without slippage, eliminating the need for secondary support on majority of applications. Grip N Grab™ cures under the influence of humidity to form a durable elastic rubber, that bonds to most building materials in a variety of applications. This 100% waterproof, low odor formula is designed for both interior and exterior projects. Grip N Grab™ is solvent free, has a quick cure time, and can even be used on damp or wet surfaces.

EXTREME GREEN STRENGTH

INTERIOR AND EXTERIOR USE

IDEAL FOR VERTICAL APPLICATIONS

HIGH STRENGTH · ALL-WEATHER · LOW VOC

Pure Silicone™

100% SILICONE SEALANT

Pure Silicone™ sealant is a specially formulated, 100% neutral cure silicone sealant for a variety of substrates such as ceramic tile, slate, wood, metal, glass, fiberglass, laminate and plastic. For use as a flexible barrier between horizontal and vertical surfaces or any other change in plane such as expansion joints, fixtures, tub surrounds, sinks, toilets, vanities, electrical plumbing penetrations, floors, walls and ceilings.

Tub & Tile Caulk™

SILICONIZED ACRYLIC CAULK

Tub & Tile Caulk™ is siliconized acrylic caulk provides a flexible seal that bonds to most common household surfaces. Ideal for filling joints where tiles abut dissimilar surfaces. Tub and Tile Caulk™ is available in sanded texture. Use around bathtub, showers, countertops, basins and many other interior areas a sealant is needed. Meets or exceed ASTM C834, standard specification for latex sealants.

915FS™

FAST-SETTING SEALANT & ADHESIVE

915FS™ is a smooth, fast-setting polyurethane sealant and adhesive capable of dynamic joint movement totaling 70% (+/-35%) of original joint geometry. It cures to a tough, flexible rubber when exposed to moisture present in the atmosphere and has physical properties that will remain relatively stable over time in varying weather conditions.

Heavy Duty™

PREMIUM CONSTRUCTION ADHESIVE

Heavy Duty™ Construction Adhesive (HDCA) is a premium grade polyurethane adhesive, that is specifically formulated for subfloor and floor joist assemblies, from site erected structures to factory constructed modular and mobile homes. Heavy Duty™ is specially formulated to bond to wet and frozen lumber.

CAULKS, SEALANTS, ADHESIVES & SPECIALTY

Blaze®

URETHANE GROUT HAZE CLEANER

Blaze® is an effective way to clean tile surfaces after installing urethane based grouts. It can be used to remove haze which may remain after urethane grout installation. While urethane grout is typically easy to clean off the surface of most tiles, more difficult surfaces to clean will benefit from the use of Blaze®.

Grout Sealer & Colorant™

SEALS & RESTORES OR CHANGES THE COLOR OF GROUT

Grout Sealer & Colorant™ is ideal for changing or restoring your grout color, and offers enhanced stain resistance. It may be applied to sanded to unsanded cement grout, and is available in 35 colors to match the Bostik color lineup.

Cartridge Guns

CARTRIDGE DISPENSING GUNS

High quality cartridge guns designed to last and make your job easier. Our standard 7:1 drive is perfect for lower viscosity products, while our deluxe 26:1 drive is perfect for the higher viscosity hardwood adhesives and construction sealants.

Ultimate™

ADHESIVE REMOVER

Ultimate™ Adhesive Remover is a readily biodegradable, low odor, water rinseable solution. Use Ultimate™ to remove wet and cured urethane adhesive from the surface of pre-finished (non-wax) wood flooring.

PanelTack™ Wall Panel and Façade Cladding System

PanelTack HM™ Adhesive

ADHESIVE FOR PANELTACK™ WALL PANEL AND FACADE CLADDING SYSTEM

PanelTack HM™ is a homogenous, highly elastic, smooth adhesive that provides a continuous bond of the panel to the support structure. PanelTack HM™ is suitable for use with various panels and wall cladding materials, including gauged porcelain tile panels, some high-pressure laminate panels (HPL), aluminum composite materials (ACM), pressed mineral wool (PMW), porous substrates, fiber cement boards (FCB), concrete, porcelain, ceramic and other natural materials.

HIGH MODULUS AND PERMANENTLY ELASTIC FOR TENSION DISTRIBUTION

INTERIOR AND EXTERIOR USE

CONTINUOUS BOND OF PANEL TO SUB-STRUCTURE

PANEL TACK™

*Sold in full cases only

PanelTack™ FoamTape™

ADHESIVE TAPE AND SPACER FOR PANELTACK™ WALL PANEL AND FACADE CLADDING SYSTEM

FoamTape™ serves as a spacer for the adhesive bead, to ensure the proper adhesive thickness between the panel and the support structure. FoamTape™ provides an initial fixation of the panel or substrate until the PanelTack HM™ adhesive has cured, while ensuring a strong, lasting bond. FoamTape™ is suitable for use with almost any panels and wall cladding materials, including gauged porcelain tile panels, high-pressure laminate (HPL), aluminum composite materials (ACM), pressed mineral wool (PMW), fiber cement boards (FCB), concrete, porcelain, ceramic, porous substrates and other natural materials.

> PROVIDES THE FIRST ADHESION ON THE FACADE PANELS WHILE THE ADHESIVE CURES

> ENSURES THE PROPER ADHESIVE THICKNESS BETWEEN THE PANEL AND THE SUPPORT STRUCTURE

> ENSURES A STRONG ADHESIVE BOND

Primer PanelTack™

MULTIPURPOSE PRIMER AND CLEANER FOR WALL PANEL AND FACADE CLADDING SYSTEMS

Primer PanelTack™ is an all-in-one cleaner and primer used on the back of façade and decorative panels, and on aluminum and stainless steel support constructions. With high coverage and a 10-minute quick drying time, Primer PanelTack™ is suitable for use with various panels and wall cladding materials, including mesh-backed GPTP, high-pressure laminate (HPL), aluminum composite materials (ACM), and other materials

> HPL AND ACM PANELS

> TRANSPARENT, QUICK-DRYING

> ENSURES A STRONG ADHESIVE BOND

Primer Q™

PRIMER FOR POROUS WALL PANEL AND FACADE CLADDING SYSTEMS

Primer Q™ is a transparent polyurethane suitable for use with various panels and wall cladding materials, including some fiber cement boards (FCB), porous substrates, and other materials.

> FOR FCB PANELS

> FOR POROUS SURFACES

> ENSURES A STRONG ADHESIVE BOND

Primer MSP™

PRIMER FOR FIBER CEMENT BOARDS, MINERAL AND POROUS WALL PANELS AND FACADE CLADDING SYSTEMS

Primer MSP™ is suitable for use with various panels and wall cladding materials, including some fiber cement boards (FCB), pressed mineral wool (PMW), natural stone, ceramic and porcelain tiles, brick, and concrete cladding panels.

> FOR FCB, PMW, NATURAL STONE, CONCRETE, POROUS AND MINERAL CLADDING PANELS

> FAST-DRYING

> ENSURES A STRONG ADHESIVE BOND
